Objet: SV: UN/CEFACT/ M+T/ Code Mgmt project

Dear Lance,

I am happy to hear things are going well! I understand you are very busy as always, but I can imagine all of that is fine when things are moving forward in a positive direction. Everything is fine here, busy as always but that's the way I like it. Not yet too cold, we got massive amounts of snow last week, but the beautiful winter landscape has now turned into grey slushy streets.

I have now read the proposal for the project, and I have the pleasure to inform you that I, as HoD for Sweden, support the project. It is important to have procedures and routines in place for managing the code lists. Taking the existing rules into account is also, in my view, a good approach.

Best regards,

Anneli

Hi Anneli,

I hope that you are doing well and that it is not yet too cold in Stockholm. Been very busy on this side for me, but everything is moving forward well.

We have recently discussed a new project within UN/CEFACT concerning code lists. As you know, in electronic messages the use of codified information is essential; and UN/CEFACT creates and maintains a large number of code lists through our recommendations and codes in the schema (like EDIFACT). This current project is planning to look at how to best manage these code lists. It has been approved by the Bureau pending three HoD support. I have attached the approved proposal for your information.

Could you please consider bringing Swedish HoD support to this project?

Thank you very much in advance for your consideration.
I hope to have the pleasure of seeing or speaking with you in the near future.

Best regards,
Lance
