Implementers of UN/CEFACT outputs are cautioned that any third-party intellectual property rights claims related to their use of a UN/CEFACT output will be their responsibility and are urged to ensure that their use of UN/CEFACT outputs does not infringe on an intellectual property right of a third

ECE does not accept any liability any possible infringement of a claimed intellectual property right or any other right that might be claimed to relate to

 the implementation of any of its outputs.

148	3.3	Purpose and scope
149		
150		The business goals of this green paper are
151		• to define how to the functional requirements, publication formats and publication
152		procedures relevant for the publication of Reference Data Model artefacts.
153		
154		The process for the publication of Reference Data Models takes account of the following aspects:
155		 Relationship with the underlying CCL
156		 Validation rules for publication formats
157		 Production of the publication bundle
158		• Maintenance of RDM ²
159

4 Publication Requirements

162 4.1 Functionality

161

163

164

165

166

167

168

169

170

177

181

186

193

195

196 197

- The publication formats support the functionalities:
 - R01 Publication of the RDMs subset of the CCL
 - R02 Reference to the underlying CCL BIE³
 - R03 Presenting the content of the underlying CCL BIE
 - R04 Presenting the RDM in a hierarchical manner
 - R05 Advanced searching capabilities
 - R06 Presenting information in a business/technical view
 - R07 Presenting restrictions made on different levels
- R08 Machine-processable information
- The capability to meet the requirements depends on the chosen publication format (see paragraph 4.4).
- 174 <u>R01 Publication of the RDM's subset of the CCL</u>
- The publication contains the fields mentioned in the specification of the publication content (section 4.2). The CCL subset has been defined by the relevant RDM.
- 178 R02 Reference to the underlying CCL BIE
- The reference is expressed as the "Unique UN Assigned ID" which is inherited from the information of the BIE of the underlying CCL.
- 182 R03 Presenting the content of the underlying CCL BIE
- The content of the underlying CCL BIE is presented by linking the RDM BIE to the content of the underlying CCL BIE using hyperlinks or a copy of the underlying CCL BIE along with the RDM BIE.
- 187 R04 Presenting the RDM in a hierarchical manner
- The business information in a RDM is structured by a Master Structure. The Business Information Entities of the RDM can be Basic Business Information Entities (BBIE), Association Business Information Entities (ASBIE), or Aggregate Business Information Entities (ABIE). The Master Structure of the RDM is presented by using a hierarchy from top to bottom. The hierarchy can be shown by unfolding entities.

194 R05 Advanced searching capabilities

- Users of a RDM must be able to find the appropriate Business Information Entity as easy as possible. The main search fields are:
 - Business name
- 198 II
- Dictionary entry name (DEN)
- 200 Definition

³ Business Information Entity

R06 Presenting information in a business/technical view

For business analysts and modelers information should be presented in a way they can easily understand or recognize. The presentation using business names is best suited for these users, as the presentation using dictionary entry names is more suitable for technical users. Both ways are presented in the RDM.

206207

208

209210

211

201

202

203

204

205

R07 Presenting inheritance of restrictions made on different levels

An important aspect of the RDM are restrictions applied to the BIEs of the underlying CCL. One example for restrictions is the choice of a limited number of artefacts (BBIEs or ASBIEs). Restrictions can be applied on different levels: on the highest level, on the BIE of the CCL or on the BIE of the RDM CCL. Therefore the RDM shall indicate at what level the restrictions are defined

212213

214

215

R08 Machine-processable information

Users may want to re-use provided business information in a RDM without re-typing the information. The RDM is therefore provided as well in a machine-processable format.

216217218

219220

4.2 Publication Content

The RDM shall be published as a "Master Structure and Subset of the CCL⁴" indicating the version of the underlying CCL. The following information items should be supported by the publication formats for holding the information for each BIE of the RDM when available:

Nr.	Information Item	Definition/Explanation Mandate				
1	Status CCL	Indicates for each BIE of the RDM whether or	Conditional			
		not there is a difference between the published				
		version of the underlying CCL and the previous				
		version				
		ADD = Add				
		CHG = Change				
		DEP = Deprecated				
2	Status Subset CCL	Indicates for each BIE of the RDM whether or	Conditional			
		not there is a difference between the published				
		version of the RDM subset of the CCL and the				
		previous version of the RDM				
		ADD = Add				
		CHG = Change				
		DEP = Deprecated				
3	Unique UN	"Unique UN Assigned ID" of the BIE of the	Yes			
	Assigned ID	underlying CCL				
4	ABIE/ BBIE/	Indication of the type of the BIE.	Yes			
	ASBIE					

⁴ The subset of the CCL is also known as the "Context Core Component Library (Context CCL)".

Nr.	Information Item	Definition/Explanation	Mandatory			
5	Dictionary Entry	The unique official name of a Business	Yes			
	Name	Information Entity				
6	Definition	The unique semantic meaning of a Business	Yes			
		Information Entity.				
7	Business Name ⁵	An alternative simplified name for each Business	Yes			
		Information Entity for use by modelers.				
8	Usage Rule(s)	Rules which describe how and/or when to use a	No			
		Business Information Entity.				
9	Example(s)	An illustration of the use of a BIE.	No			
10	Publication	Additional explanatory information published in	No			
	comments	the CCL.				
11	TDED	Identifier to link to a specific data element in the	No			
		United Nations Trade Data Elements Directory				
		(UNTDED).				
12	Object Class Term	A word or group of words which help define an	No			
	Qualifier(s)	object class.				
13	Object Class Term	The name of a logical data grouping to which a	Yes			
		data element or association belongs.				
14	Property Term	A word or group of words which help define an	No			
	Qualifier(s)	object class property.				
15	Property Term	A semantically meaningful name for a	No			
4.5		characteristic of an object class.				
16	Datatype	Qualifier for the datatype of a Basic Business	No			
1.5	Qualifier(s)	Information Entity.	2.5			
17	Representation	The datatype, such as numeric or text, of a	Mandatory			
10	Term	Business Information Entity.	for BBIE.			
18	Qualified Data	Unique UN Assigned ID.	No			
10	Type UID		3.7			
19	Associated Object	A word or group of words which help define an	No			
	Class Term	associated object class				
20	Qualifier(s)	The name of an abject class associated from the	No			
20	Associated Object	The name of an object class associated from the	No			
	Class	Business Information Entity Object Class as a				
21	Occurrence Min	complex characteristic. Minimum occurrence of the Business	Mondotomy			
41	Occurrence Willi	Information Entity in the RDM.	Mandatory for BBIE			
		information Entity in the KDWI.	and ASBIE.			
22	Occurrence Max	Maximum occurrence of the Business	Mandatory			
22	Occurrence Max	Information Entity characteristic (data element	for BBIE			
		or association) in the RDM.	and ASBIE.			
	1	or abbotiation) in the KDW.	una ADDIL.			

4.3 Publication Formats

The Reference Data Model shall be published in the following formats:

1. PDF

225

226

227

228229

230

231

232233

234235

236

237

238

239

240

246

- 2. Excel
- 3. HTML
- 4. Compressed HTML
- 1. The **PDF format** is fully based on an internal Word-format that is not published. A template for the structure of the PDF format is described in annex 1⁶.
 - 2. The **Excel format** is a subset of the columns provided in the full CCL publication, but it has two new column: "Status of Subset CCL" and "Status of the CCL". This first one indicates whether or not there is a difference between the published version of the RDM subset of the CCL and the previous version. The second one is equal to the present CCL column named (ADD/CHG/DEP/WDR⁷). A template for the structure of the excel format is described in annex 2⁸.
 - 3. The **HTML format** is described in annex 3⁹.
 - 4. The **Compressed HTML format** is described in annex 4^{10} .

The high level Business Requirement Specification (BRS) and Requirement Specification Mapping (RSM) are part of the publication of the RDM and have to be updated when any changes made in the Reference Data Model impact the high-level business requirements, business artefacts and definitions of the high level BRS and RSM. The high level BRS/RSM are published as PDF documents.

⁶ See annex

⁷ ADD = Added, CHG = Changed, DEP = Deprecated, WDR = Withdrawn

⁸ See annex 2

⁹ See annex 3

¹⁰ See annex 4

4.4 Mapping of Functionality to the different Publication Formats

247

248

249250

251 252

253

257

258

261262

The full list of functional requirements cannot be fulfilled by every publication format. The following table maps the functional requirements to the different publication formats:

Figure 1 Mapping of Functionality to the different Publication formats

254 Green : Desirable and currently possible 255 Orange : Desirable but not yet possible 256 Grey : Not desirable in this format

R03 Orange : When the CCL is published in the HTML format they could be linked to

show underlying CCL.

259 R05 Green : Depending on Compressed HTML viewer tools being used.

260 R07 Orange : When the CCL is published in the HTML format they could be linked to

show restrictions made on different levels.

5 Publication Procedures of Reference Data Models

263264

The publication procedures of Reference Data Models are the responsibility of the Library Maintenance Focal Point to produce the publication formats.

2 February 2017 1.0.0.8 *UN/CEFACT* Page 11 of 19
