2   Introduction

The current practice of the exchange of business documents by means of telecommunications – usually defined as e-Business presents a major opportunity to improve the competitiveness of companies, especially for Small and Medium Enterprises (SME). Started as an initiative by CEN/ISSS Work shop eBES, the European Expert Group 1 (EEG1) – Supply Chain & e-Procurement developed the Cross Industry Despatch and Receive process in 2006. The Cross Industry Despatch and Receive process has been compiled using the EUROFER ESIDEL version 1.0 and the Boost Aero version 1.0 as a base, with contributions and submissions from: EUROFER, ODETTE, GS1, EDIFrance, EDIBUILD and Boost Aero.

After the UN/CEFACT Forum meeting in Dublin in March 2007, the BRS was further developed with requirements contributed from TBG1 members such as GS1, UBL, EDIFrance, US Department of Defense, JAIF and others. Also requirements were implemented from Construction (TBG 6). The structure was reworked according to the Buy-Ship-Pay process model developed by TBG 14. The high level entity model was based on the Buy-Ship-Pay information model jointly developed by TBG1, TBG2, TBG3, TBG5 and TBG18.

3   Objective

The objective of this document is to standardize the Business processes, the Business transactions and the Information entities of the despatch and receive process used by the industries in the supply chain. The business process is the detailed description of the way trading partners intend to play their respective roles, establish business relations and share responsibilities to interact efficiently with the support of their respective information systems. Each Business transaction is realized by an exchange of Business documents (also called messages). The sequences in which these documents are used, composes a particular instance of a scenario and are presented as activity diagrams in the document.

4   Audience

The audience of this document is all users who are interested in the delivery process and information data.

5   Reference Documents

Knowledge and application of the following standards is crucial to the development of quality business requirements specifications. Other key references are shown in the appropriate part of the document.

Categories	Description and Values
Business Process	Despatch and Receive process in the supply chain BUY-SHIP-PAY/Procurement&Sales/Delivery
Product Classification	All
Industry Classification	All
Geopolitical	Global
Official Constraint	None
Business Process Role	ShipFrom, ShipTo
Supporting Role	Carrier
System Capabilities	No limitations

Note:
The processes defined apply only to the collaboration between Ship From (sender of goods) and Ship To (receiver of goods). Internal processes and communication with third parties (such as Transporters, Warehouses, etc.) are outside the scope of this BRS. However the Carrier (Transporter) is in a supporting role in the process as some of the generated documents/data will be carried by them for Proof-of-Delivery Process (POD) and also may re-use information such as locations, weight and Transport packaging

7.1 Business Process Elaboration

The processes contained in the Despatch and Receive process are shown in the following Use Case Diagram.
Figure 7-2 Scope of the despatch and receive process

The despatch and receive process covers the physical delivery of goods from one physical site to another according to agreements between the supplier and customer in order to fulfill a delivery contract.

The process requires an existing commercial contract between a customer buyer and a supplier seller. This contract can be established in several ways, as spot order, call off order, if necessary, further detailed in a delivery instruction etc. Prior to the delivery, the customer and the supplier must also agree upon the delivery conditions and the way the transportation of goods is to be organized.

Note:
Ship From may be the supplier (or one of supplier's subsidiaries) but not necessarily. Neither has the Ship To to be the Customer of the Goods. Therefore, neither the term Supplier nor Customer is applicable to describe this partner. An analogous situation applies to Ship To. For instance, as part of a shipping process, the Goods may be sent to a Logistics Service Provider (LSP) e.g. Packing or Consolidation company. In this case the Ship To Party is the LSP. When the Goods have been Re-packed then the Ship From Party will be the LSP.

In the Despatch and Receive process it is foreseen to transmit information between the Ship From and the Ship To concerning:

- The shipment and the consigned goods despatched by the Ship From.
- If necessary, corrected details of a shipment and/or the consigned goods despatched by the Ship From.
- The receipt of the shipment and the consigned goods by the Ship To.

The Despatch and Receive process covers the way in which information is provided on the despatch of goods and on the receipt of goods.

Providing information to the Ship To of the despatch of goods at (or near to) the moment of departure, allows the Ship To to prepare for the reception of the goods. Providing information about the reception of the goods allows the Ship From to check the correct arrival of the despatched goods and the information can be used as a trigger to send an invoice to the customer.

Note:
The structure of the Despatch Advice should be very similar to the Invoice because in integrated systems the workflow will create an Invoice from this data or both documents will be derived from the same source. The focus of this document is on logistics data and so will provide information for packaging and stock control. Of course an Invoice may also be sufficient, as in the case of Point-Of-Sale systems, however a Despatch Advice is more explicit and indicates the actual movement and may also be required where the pricing information is either not available or is sensitive.

Information exchanged to inform the Ship To about the goods despatched may be structured as described below:
- Item based, giving the details of a consignment from the point of view of the goods despatched
- Package based, giving the details of a consignment from the point of view of the package used for the transportation, i.e. the handling units and the package units within which the goods are despatched.
- A combination of both approaches is possible.

In certain circumstances, e.g. because of transportation incidents, the Ship From may need to correct or cancel the despatch and inform the Ship To accordingly.

Once the Ship To has received the goods (or units), he will check them against the goods (or units) advised in the despatch information. The Ship To may then send to the Ship From, a confirmation of the reception of the goods (or units) and, if applicable, a notification of any discrepancies.

7.1.1 Business Process Flow

Ship From prepares shipment according to previously received instructions or in agreement with terms of delivery as specified in an order. Parallel to the preparation of the physical shipment all necessary data for an electronic Despatch Advice message is collected and compiled. The message is being sent from Ship From to Ship To.

In the event of changes in the shipment after the transmission of the despatch advice the Ship From compiles a Despatch Advice correction message and sends it to Ship To.

After receiving and – if necessary – inspection of the goods the Ship To creates an electronic Receiving Advice message. This message confirms the received goods and their quantity. It may contain statements concerning the conditions of received goods and their compliance with the order or otherwise agreed quality standards.

The Activities involved in the Despatch and Advice processes are shown in figure 4-3 together with the states of the "Delivery" Business Entity that are changed by the processes.
Figure 7-3 Business Process Activity Diagram

The states that the Delivery Business Entity may assume as a result of the Despatch and Receive business process are shown in the Entity Life Cycle diagram figure 4-4.

7.1.2 Business Collaboration
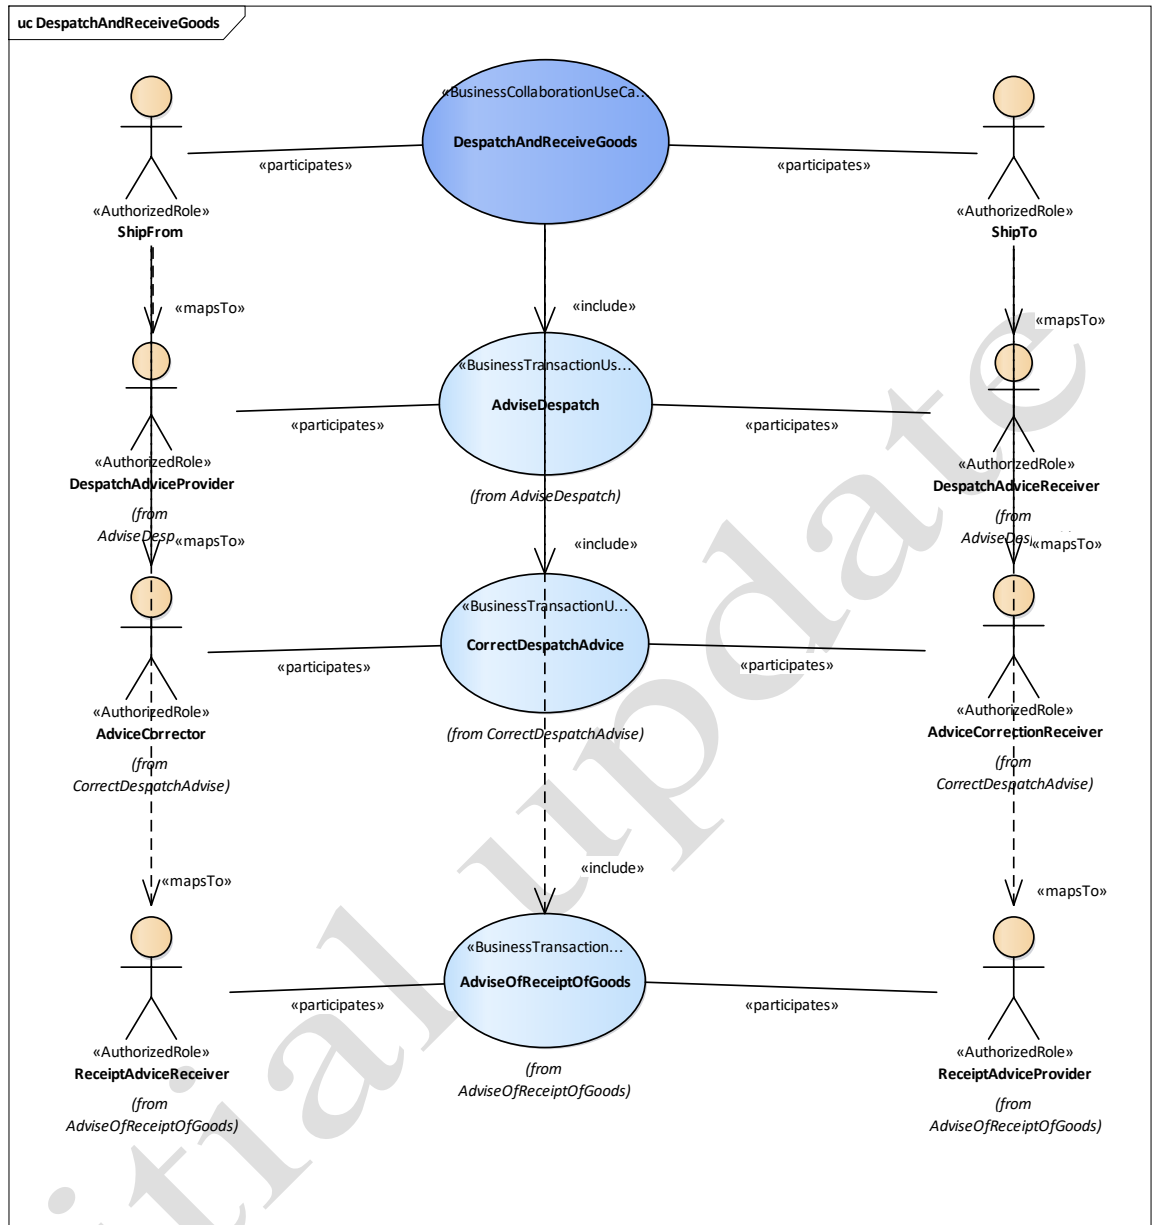

Figure 7-5 The Business Collaboration diagram

The Business Collaboration diagram figure 4-5 (above) shows the three transactions that make up the Despatch and Receive process. It also links the authorised roles from each transaction to the Business Partner Types (Ship From and Ship To). The logical order in which these transactions may occur is shown in the Business Collaboration Protocol diagram figure 4-6 (below). The Use Case Diagrams and description of the three business transactions are shown in Section 4-3

8.2.1 Advise Despatch (Business Transaction)
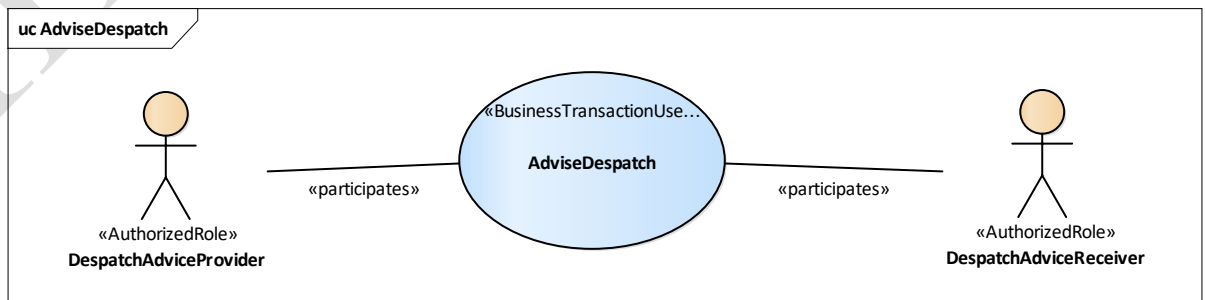

Figure 8-2 Business Transaction Use Case Diagram Advise Despatch

Table 8-1 Business Transaction Use Case Description Advise Despatch

Identifier	Advise Despatch
Business Message Type	Despatch Advice
Description	Once the goods are ready to leave (or have just left) the ship from location the Ship From sends a despatch advice to the Ship To to inform him about the despatch. Once the Ship To has received the despatch advice, the process ends.
Partner Types	Ship From, Ship To
Authorized Roles	Despatch Advice Provider, Despatch Advice Receiver.
Legal Implications	In certain cases (such as Ex-works terms) the customer may have taken responsibility for the custody of the goods when the Despatch Advice has been sent. This may also effect ownership.
Initial/Terminal Events	• Initial: the goods are ready to leave (or have just left) the ship from location. • Terminal: the Ship To has received the despatch advice (and can prepare for reception of the goods)
Scope	Information exchange between Ship From and Ship To concerning the despatch of goods.

Figure 8-4 Business Transaction Use Case Diagram Correct Despatch Advise
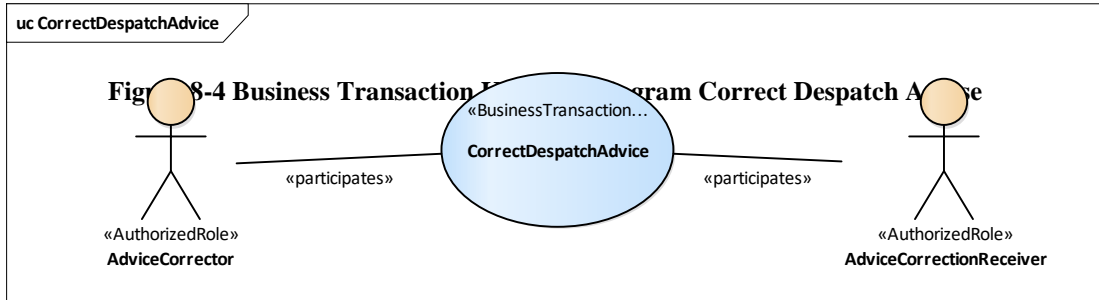

Table 8-2 Business Transaction Use Case Description Correct Despatch Advise

Identifier	Correct Despatch Advice
Business Message Type	Despatch Advice
Description	Once the goods have left the ship from location and a change occurs in the delivery or the delivery is cancelled, the Ship To is informed.
Partner Types	Ship From, Ship To
Authorized Roles	Advice Corrector, Advice Correction Receiver
Legal Implications	In certain cases (such as Ex-works terms) the Ship To may have taken responsibility for the custody of the goods when the Despatch Advice was sent.
Initial/Terminal Events	• Initial: the shipment details are changed or the shipment is cancelled. • Terminal: the ShipTo has received the corrected despatch advice.
Scope	Information exchange between Ship From and Ship To concerning the despatch of goods.

8.2.3 Advise Receipt (Business Transaction)

Figure 8-6 Business Transaction Use Case Diagram Advise Receipt
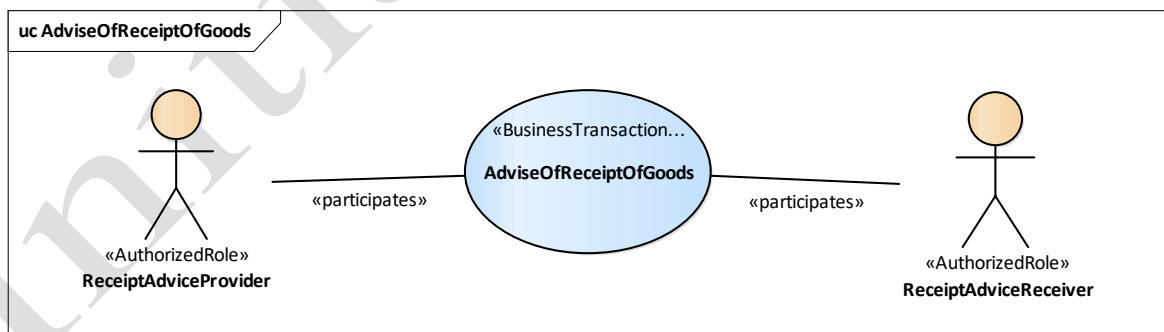

Table 8-3 Business Transaction Use Case Description Advise Receipt

Identifier	Advise Receipt
Business Message Type	Receiving Advice
Description	The Ship To prepares and sends a receiving advice to the Ship From to confirm reception of the goods and, if applicable, notify any discrepancies between the goods received and those announced in the despatch advice. Once the Ship From has received the receiving advice, the process ends.
Partner Types	Ship From, Ship To
Authorized Roles	Receipt Adviser, Receipt Receiver
Legal Implications	Ship To has taken responsibility for the custody of the goods. This may have effects on ownership or payment. The receiving advice document has an important legal value in the commercial process.
Initial/Terminal Events	- Initial: the shipment details are changed or the shipment is cancelled. - Terminal: the ShipTo has received the corrected despatch advice.
Scope	To report on the goods received by the Ship To.
