### Requirements gathering

The [Information note](#) is approved for public review.

It is decided that the cloud/process/business rules requirements mandate a separate project. The section remains in the information note as useful input.

### Draft development

A first draft of BRS and RSM for Journal Book are prepared and reviewed during the meeting.

The BRS for Journal Book is completed during the meeting and is approved for public review.

The RSM is also approved for public review. Some minor editorial work remains and will be carried out by the editor (Frederique Danjon) before the document is sent for public review.

### Harmonization

A meeting with the harmonization team clarifies the process: a submission can take place in parallel with the public review. They would indeed prefer a early submission rather than a late one.

### ISO/PC 295

Eric Cohen is in Beijing as UN/CEFACT liaison with ISO/PC 295. He will report on his progress at a later time.
