

README file: Public review of CII based on CCTS 2 & CCBDA 1.0 & NDR 2.01

Introduction

Welcome to the readme file for the public review of the first Cross Industry Invoice (CII) constructed by using the CCBDA procedures and rules. This file provides a summary of how this CCBDA CII was produced, what the review package contains, and how you can comment on it.

Background

The migration of CII is derived from the published CII version D.15B. The corresponding published BRS is unchanged. The corresponding RSM document (version 2.0.08) is used to develop a new RSM version based on the new template for RSMs.

Contents

This review package contains the following files:

1. This readme file.
2. The CCBDA CII RSM document.
3. The CCBDA CII schema.
4. A blank comment log for the CCBDA CII RSM document.
5. A blank comment log for the CCBDA CII Schema.
6. CCBDA CII CCL15B Validation Statement.
7. Relationship CCL ABIE – CCBDA CII MBIE spreadsheet
8. CCBDA Cross Industry Message Assembly spreadsheet

Public Review Process

You can comment on the RSM document or the CCBDA CII schema or both.

All comments should be submitted to Rolf Wessel (r.wessel@seeburger.de) with a copy to Karina Duvinger (karina.duvinger@gs1.se) not later than the date posted by the Secretariat.

Comments received will be used to improve both the deliverables as well as the processes used to produce them.
