# 1 Preamble

This Business Requirements Specification (BRS) document builds upon the general principles set out in the P1000 – 1; General Principles BRS document and details the "Vessel" business domain identified in P1000 – 1 as P1000 – 2.

This BRS aims to standardise the exchange of fishing fleet data, more specifically the information directly related to fishing vessels and vessels supporting fishing operations.

The structure of this document is based on the structure of the UN/CEFACT Business Requirements Specification (BRS) document reference CEFACT/ICG/005, and makes use of the UN/CEFACT Modelling Methodology (UMM) approach and Unified Modelling Language (UML).

# 2 References

# 3 **Objective**

The objective of this document is to propose a standard for the communication of information of vessel characteristics, and optionally the history of changes applied on the vessel characteristics, between interested parties, such as the vessels' Flag States, International Institutions, Regional Fishery Bodies (RFBs), Regional Fishery Management Organisations (RFMOs) and many others.

# 4 Scope

#### 4.1 General Context

The following diagram illustrates the general context of the business:

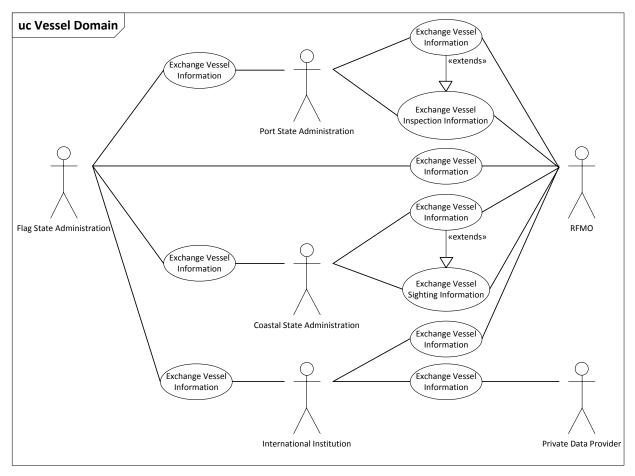

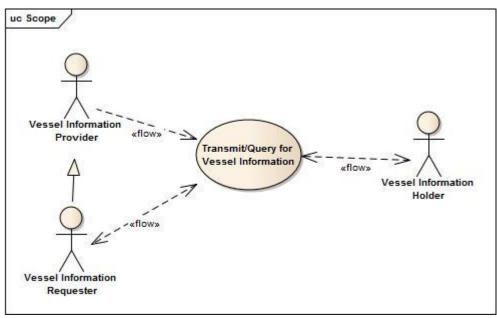

Figure 1: Use Case diagram for general context of Vessel domain

The worldwide context considers a number of parties which exchange vessel data, for internal use within the receiving party; for the receiving party to update, extend and return it or, possibly, for the receiving party to disseminate publicly. Each party may possibly act as both a sender and a receiver of data, and may perform data management operations on all or part of the data at any time. In each case, data may be requested by the receiver or reported by the sender according to the particular scenario at hand. The above diagram illustrates the most common parties and expected uses, but should not be considered to be exhaustive.

#### 4.2 Vessel Domain Scope

#### Figure 2: Scope of Vessel Domain

The scope of this project is limited to the exchange of information between two parties at a time, in a single direction. Examples include the Vessel Information data transmission between a Flag State Administration and an RFMO, or a Port State Administration and an International Institution, or a Private Data Provider and International Administration, and so forth.

The scope of the project includes also the possibility for a requester, who might be a vessel information provider too, to retrieve some information from one of the involved parties holding this information.

| Categories              | Description and Values                             |  |
|-------------------------|--|--|
| Business Process        | General Message Exchange – Vessel information      |  |
| Product Classification  | Vessel data  |  |
| Industry Classification | Fisheries sector                                   |  |
| Geopolitical            | Global   |  |
| Official Constraints    | National regulations                               |  |
|                         | Regional regulations (including EC regulations)    |  |
|                         | Locally applicable regulations                     |  |
|                         | International agreements                           |  |
| Business Process Role   | User of vessel information                         |  |
| Supporting Role         | None   |  |
| System Capabilities     | Agreed level of security to protect data integrity |  |

# 5 Stakeholders

Each actor as described in scope of this document can be one of the following stakeholders:

| Flag State<br>Administration    | The administration of the Flag State of the vessel is considered,<br>in general, to be the primary source of certified vessel<br>information, and is therefore one of the providers of vessel data.   |
|---------------------------------|---|
| Coastal State<br>Administration | The administration of the Coastal State where a vessel may be<br>fishing generally requires vessel information and may be<br>considered one of the receivers of vessel data. They could also<br>be responsible for updating the data and sending it as part of<br>vessel sightings information.                                 |
| Port State<br>Administration    | The administration of the Port State where a vessel lands after a fishing trip to sell the catch, or to transport supplies into the harbour, definitely requires information on the vessels entering the port, but would also be ideal providers of updated data, given that they usually carry out inspections on the vessels. |
| International<br>Institutions   | International Institutions are often given the mandate to collect<br>data from their members and disseminate data on their behalf,<br>and may therefore be considered both holder and provider of the<br>data, as the case may be.  |
| RFBs and<br>RFMOs               | Regional Fishery Bodies (RFBs) and Regional Fishery<br>Management Organisations (RFMOs) often require vessel<br>information to issue authorisations, enforce control or simply<br>manage the areas under their regulatory area, and should be<br>considered consumers of vessel information.                                    |
| Private Data<br>Providers       | Private data companies often obtain vessel information in order<br>to carry out commercial activities, and may be considered to be<br>providers of vessel information.  |
| Other                           | It should not be excluded that other parties may require or be<br>able to provide vessel information, or that any of the above<br>mentioned parties may be considered both as provider or<br>requester of vessel information.   |

# **6 Business Requirements**

#### 6.1 Business Requirements View

In the context of management of fishing vessels, and other vessels supporting fishing activity, parties need to have information on vessel identification numbers, physical characteristics, registration information, ownership and so forth. Data for individual vessels may be available at different sources, but it is often necessary to collect and put together the relevant data for a number of vessels, or to exchange individual vessel information with other parties.

#### 6.2 Business process elaboration

#### **Report Vessel Information**

#### Principles

One party must report vessel information to another party, possibly at regular intervals or when a particular event occurs.

#### Use Case

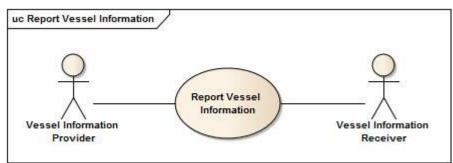

Figure 3: Use Case diagram for Report Vessel Information message transmission

| Business process name | Report Vessel Information  |  |  |
|-----------------------|--|--|--|
| Identifier            | RVI  |  |  |
| Actors                | Vessel Information Provider, Vessel Information Receiver   |  |  |
| Description           | Vessel Information Provider reports the vessel information to a partner who needs to receive it. |  |  |
| Pre-condition         | Underlying framework to exchange FLUX business messages  |  |  |
| Post-conditions       | None   |  |  |
| Scenarios             | None   |  |  |
| Remarks               | None   |  |  |

#### **Query for Vessel Information**

#### Principles

One party requests vessel information to another party who holds this information, possibly in a Fleet Register, at regular intervals or when a particular event occurs.

#### **Use Case**

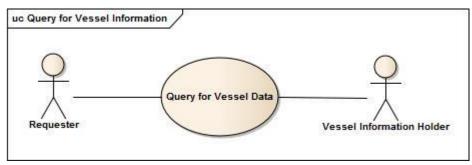

Figure 4: Use Case diagram for Query for Vessel Information message transmission

| Business process name | Query for Vessel information   |  |  |
|-----------------------|--|--|--|
| Identifier            | QVI  |  |  |
| Actors                | Vessel Information Requester, Vessel Information Holder                    |  |  |
| Description           | A requester queries a partner holding vessel information and retrieves it. |  |  |
| Pre-condition         | Underlying framework to exchange FLUX business messages                    |  |  |
| Post-conditions       | None   |  |  |
| Scenarios             | None   |  |  |
| Remarks               | None   |  |  |

#### 6.3 Information Flow Definition

#### **Report Vessel Information Message Transmission**

#### **Activity Diagram**

The following activity diagram defines the significant information flows between the vessel information provider and vessel register receiving the message.

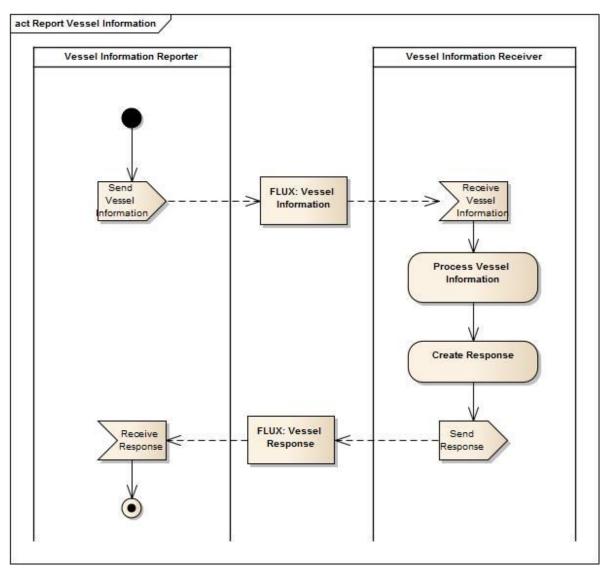

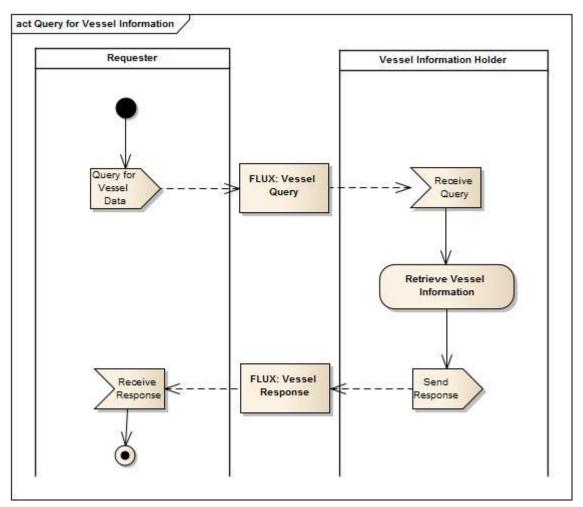

Figure 5: Activity Diagram for Report Vessel Information message transmission

In accordance with the FLUX general principles, all transmissions will end in a response from message receiver to message sender, indicating whether the message has been processed successfully or otherwise.

#### **Query for Vessel Information Message Transmission**

#### Activity Diagram

The following activity diagram defines the significant information flows between the requester for vessel information and the holder of this information.

In accordance with the FLUX general principles, all transmissions will end in a response from message receiver to message sender, indicating whether the message has been processed successfully or otherwise.

#### 6.4 Information model definition

The Class Diagram below describes all the necessary classes of information for a flow of information exchange in the context of Vessel domain message transmission.

#### **FLUX Report Vessel Information Declaration:**

Description: The type of message which is used when reporting for vessel information<sup>1</sup>.

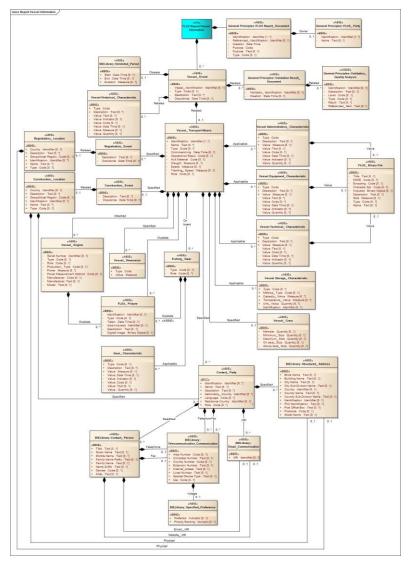

Figure 7: Class Diagram for Report Vessel Information message.

<sup>&</sup>lt;sup>1</sup> General Principles entities, such as *FLUX Result\_ Document, FLUX Report Party, Validation Result\_ Document, Validation\_ Quality Analysis* are defined in FLUX P1000-1; General Principles BRS.

#### Vessel\_ Event Entity

Description: Entity containing information of a significant occurrence or happening related to a vessel.

| Mult. | Business term             | Rel. | Туре                                 | Description  |
|-------|---------------------------|------|--------------------------------------|--|
| 01    | Vessel_<br>Identification | Att  | Identifier                           | The vessel identifier for this vessel event.   |
| 01    | Туре                      | Att  | Code                                 | The code specifying the type for this vessel event.  |
| 0n    | Description               | Att  | Text                                 | A textual description of this vessel event.  |
| 01    | Occurrence                | Att  | Date Time                            | The date, time, date time, or other date time value of an occurrence of this vessel event. |
| 01    | Discrete                  | Ass  | Delimited_ Period                    | The discrete delimited period for this vessel event.                                       |
| 0n    | Related                   | Ass  | Vessel Historical_<br>Characteristic | A vessel historical characteristic related to this vessel event.                           |
| 01    | Related                   | Ass  | Vessel_ Transport<br>Means           | The vessel transport means related to this vessel event.                                   |
| 0n    | Related                   | Ass  | Validation Result_<br>Document       | A validation result document related to this vessel event.                                 |

## **Delimited\_Period Entity**

Description: Entity use to provide information of a period of time from a start date time onwards up to an end date time.

| Mult. | Business term | Rel. | Туре      | Description  |
|-------|---------------|------|-----------|--|
| 01    | Start         | Att  | Date Time | The date, time, date time or other date time value for the start of this delimited period.               |
| 01    | End           | Att  | Date Time | The date, time, date time or other date time value for the end of this delimited period.                 |
| 01    | Duration      | Att  | Measure   | The measure of the length of time for this delimited period such as hours, days, weeks, months or years. |

## Vessel Historical\_Characteristic Entity

Description: A prominent attribute or aspect of the history related to a particular vessel.

| Mult. Business term Rel. Type Description |
|---|
|---|

| 1  | Туре        | Att | Code      | The code specifying a type of historical characteristic of a vessel.  |
|----|-------------|-----|-----------|---|
| 0n | Description | Att | Text      | A textual description of this historical characteristic of a vessel.  |
| 01 | Value       | Att | Text      | The value, expressed as text, of this historical characteristic of a vessel.  |
| 01 | Value       | Att | Indicator | The value, expressed as an indicator, for this historical characteristic of a vessel.                                     |
| 01 | Value       | Att | Code      | The code specifying a value of this historical characteristic of a vessel.  |
| 01 | Value       | Att | Date Time | The value, expressed as a date, time, date time, or other date time value, of this historical characteristic of a vessel. |
| 01 | Value       | Att | Measure   | The measure of the value for this historical characteristic of a vessel.  |
| 01 | Value       | Att | Quantity  | The value, expressed as a quantity, for this this historical characteristic of a vessel.                                  |

# Vessel\_ Transport Means Entity

Description: Entity containing the identification and characteristic information of a ship or boat.

| Mult. | Business term      | Rel. | Туре       | Description   |
|-------|--------------------|------|------------|---|
| 0n    | Identification     | Att  | Identifier | An identifier for this transport means vessel, such as an identifier defined by the Food and Agriculture Organisation (FAO), the radio call sign, or an external marking.   |
| 0n    | Name               | Att  | Text       | A name, expressed as text, of this transport means vessel.  |
| 0n    | Туре               | Att  | Code       | A code specifying a type of this vessel transport means.  |
| 01    | Commissioning      | Att  | Date Time  | The date, time, date time or other date time value of the commissioning of this vessel transport means, such as the date of issue of the first safety certificate, the date of first entry in official register of fishing vessels. |
| 01    | Operational Status | Att  | Code       | The code indicating the operational status for this vessel transport means, such as in service/commission, broken up, total loss, continued existence in doubt, laid-up.  |
| 01    | Hull Material      | Att  | Code       | The code indicating the material of the hull for this vessel transport means.   |
| 01    | Draught            | Att  | Measure    | The measure of the draught for this transport means vessel.   |
| 01    | Speed              | Att  | Measure    | The speed measured for this transport means vessel.   |
| 01    | Trawling_ Speed    | Att  | Measure    | The trawling speed measured for this transport means vessel.  |
| 01    | Role               | Att  | Code       | The code specifying the role of this vessel transport means.  |

| 0n | Specified  | Ass | Registration_ Event                         | A registration event specified for this vessel transport means.                   |
|----|------------|-----|---|---|
| 01 | Specified  | Ass | Construction_Event                          | The construction event specified for this vessel transport means.                 |
| 0n | Attached   | Ass | Vessel_Engine                               | A vessel engine attached to this transport means vessel.                          |
| 0n | Specified  | Ass | Vessel_ Dimension                           | A dimension specified for this transport means vessel.                            |
| 0n | Illustrate | Ass | FLUX_ Picture                               | A FLUX picture illustrating this transport means vessel.                          |
| 0n | On Board   | Ass | Fishing_ Gear                               | Fishing gear which is on board this transport means vessel.                       |
| 0n | Specified  | Ass | Contact_ Party                              | A contact party specified for this transport means vessel.                        |
| 01 | Specified  | Ass | Vessel_Crew                                 | The vessel crew specified for this transport means vessel.                        |
| 0n | Applicable | Ass | Vessel Storage_<br>Characteristic           | A vessel storage characteristic applicable to this transport means vessel.        |
| 0n | Applicable | Ass | Vessel Technical_<br>Characteristic         | A technical characteristic of a vessel applicable to this transport means vessel. |
| 0n | Applicable | Ass | Vessel Equipment_<br>Characteristic         | A vessel equipment characteristic applicable to this transport means vessel.      |
| 0n | Applicable | Ass | Vessel<br>Administrative_<br>Characteristic | A vessel administrative characteristic applicable to this transport means vessel. |

## **Registration Event Entity**

Description: Entity used to provide information on a significant occurrence related to a registration of person, animal, object or process.

| Mult. | Business term | Rel. | Туре                  | Description   |
|-------|---------------|------|-----------------------|---|
| 0n    | Description   | Att  | Text                  | A textual description of this registration event.   |
| 01    | Occurence     | Att  | Date Time             | The date date, time, date time, or other date time value, of the occurrence of this registration event. |
| 01    | Related       | Ass  | Registration_Location | The location related to this registration event.  |

#### **Registration\_Location Entity**

Description: Entity used to provide information on a physical location or place of registration, such as a country or a port.

| Mult. | Business term | Rel. | Туре | Description |
|-------|---------------|------|------|-------------|
|-------|---------------|------|------|-------------|

| 01 | Country             | Att | Identifier          | The identifier of a country for this registration location.  |
|----|---------------------|-----|---------------------|--|
| 0n | Description         | Att | Text                | A textual description of this registration location.   |
| 01 | Geopolitical Region | Att | Code                | The code specifying the geopolitical region for this registration location.  |
| 0n | Identification      | Att | Identifier          | An identifier for this registration location, such as a United Nations<br>Location Code (UNLOCODE) or GS1 Global Location Number<br>(GLN). |
| 0n | Name                | Att | Text                | A name, expressed as text, of this registration location.  |
| 01 | Туре                | Att | Code                | The code specifying the type of registration location.   |
| 01 | Physical            | Ass | Structured_ Address | The physical structured address of this registration location.   |

# **Construction Event Entity**

Description: Entity used to provide information on a significant occurrence related to a construction of an object.

| Mult. | Business term | Rel. | Туре                      | Description   |
|-------|---------------|------|---------------------------|---|
| 0n    | Description   | Att  | Text                      | A textual description of this construction event.   |
| 01    | Occurrence    | Att  | Date Time                 | The date date, time, date time, or other date time value, of the occurrence of this construction event. |
| 01    | Related       | Ass  | Construction_<br>Location | The location related to this construction event.  |

# **Construction Location Entity**

Description: Entity used to provide information on a physical location or place of construction.

| Mult. | Business term       | Rel. | Туре       | Description  |
|-------|---------------------|------|------------|--|
| 01    | Country             | Att  | Identifier | The identifier of a country for this construction location.  |
| 0n    | Description         | Att  | Text       | A textual description of this construction location.   |
| 01    | Geopolitical Region | Att  | Code       | The code specifying the geopolitical region for this construction location.  |
| 0n    | Identification      | Att  | Identifier | An identifier for this construction location, such as a United Nations Location Code (UNLOCODE) or GS1 Global Location Number (GLN). |
| 0n    | Name                | Att  | Text       | A name, expressed as text, of this construction location.  |
| 01    | Туре                | Att  | Code       | The code specifying the type of construction location.   |

| 0n | Specified | Ass | Contact_ Party      | A contact party specified for this construction location.      |
|----|-----------|-----|---------------------|--|
| 01 | Physical  | Ass | Structured_ Address | The physical structured address of this construction location. |

#### Vessel\_ Engine Entity

Description: Entity used to provide information of an engine which is used to move a ship or boat.

| Mult. | Business term                  | Rel. | Туре         | Description  |
|-------|--------------------------------|------|--------------|--|
| 01    | Serial Number                  | Att  | Identifier   | The serial number identifier of this vessel engine.  |
| 01    | Туре                           | Att  | Code         | The code specifying the type of vessel engine.   |
| 01    | Role                           | Att  | Code         | The code specifying the role of this vessel engine, such as main or secondary.                 |
| 01    | Propulsion_Type                | Att  | Code         | The code specifying the type of propulsion for this vessel engine.                             |
| 0n    | Power                          | Att  | Measure      | A measure of the power produced by this vessel engine, expressed in a unit such as horsepower. |
| 01    | Power<br>Measurement<br>Method | Att  | Code         | The code specifying the measurement method used for measuring the power of this vessel engine. |
| 01    | Manufacturer                   | Att  | Code         | The code specifying the manufacturer of this vessel engine.                                    |
| 01    | Manufacturer                   | Att  | Text         | The manufacturer, expressed as a text, of this vessel engine.                                  |
| 01    | Model                          | Att  | Text         | The model, expressed as a text, of this vessel engine.   |
| 0n    | Illustrate                     | Ass  | FLUX_Picture | A FLUX picture illustrating this vessel engine.  |

#### Vessel\_ Dimension Entity

Description: A measure of length, tonnage, depth or breadth, expressed as type and value, for this vessel.

| Mult. | Business term | Rel. | Туре    | Description   |
|-------|---------------|------|---------|---|
| 1     | Туре          | Att  | Code    | The code specifying a type of dimension of this vessel. |
| 1     | Value         | Att  | Measure | The measure of the value for this vessel dimension.     |

# Fishing\_Gear Entity

| Mult. | Business term | Rel. | Туре                 | Description  |
|-------|---------------|------|----------------------|--|
| 01    | Туре          | Att  | Code                 | The code specifying the type of fishing gear.  |
| 0n    | Role          | Att  | Code                 | The code specifying the role of this fishing gear, such as main gear, subsidiary gear. |
| 0n    | Illustrate    | Ass  | FLUX_Picture         | A FLUX picture illustrating this fishing gear.   |
| 0n    | Applicable    | Ass  | Gear_ Characteristic | A characteristic applicable to this fishing gear.                                      |

Description: Entity used to provide information on the apparatus which is used for fishing.

## Vessel Equipment Characteristic Entity

Description: A prominent attribute or aspect of equipment related to a particular vessel.

| Mult. | Business term | Rel. | Туре              | Description   |
|-------|---------------|------|-------------------|---|
| 1     | Туре          | Att  | Code              | The code specifying a type of vessel equipment characteristic, such as Vessel Monitoring System (VMS), Automatic Identification System (AIS), |
| 0n    | Description   | Att  | Text              | A textual description of this vessel equipment characteristic.  |
| 01    | Value         | Att  | Measure           | The value, expressed as value, for this vessel equipment characteristic.  |
| 0n    | Value         | Att  | Text              | A value, expressed as text, of this vessel equipment characteristic.  |
| 0n    | Value         | Att  | Code              | A code specifying a value of this vessel equipment characteristic.  |
| 01    | Value         | Att  | Date Time         | The value, expressed as a date, time, date time, or other date time value, of this vessel equipment characteristic.                           |
| 01    | Value         | Att  | Indicator         | The value, expressed as an indicator, for this vessel equipment characteristic.   |
| 01    | Value         | Att  | Quantity          | The value, expressed as a quantity, for this vessel equipment characteristic.   |
| 01    | Value         | Ass  | FLUX_ Binary File | The value for this vessel equipment characteristic, such as radio certificate, expressed in a FLUX binary file.                               |

## Vessel Administrative Characteristic Entity

Description: A prominent attribute or aspect of an administrative decision related to a vessel.

| Mult. Business term Rel. Type Description | Mult. | Business term | Rel. | Туре | Description |
|---|-------|---------------|------|------|-------------|
|---|-------|---------------|------|------|-------------|

| 1  | Туре        | Att | Code              | The code specifying a type of administrative characteristic of a vessel, such as mainland fleet, aquaculture, public aid code, administrative decision code. |
|----|-------------|-----|-------------------|--|
| 0n | Description | Att | Text              | A textual description of this vessel administrative characteristic.  |
| 01 | Value       | Att | Measure           | The value, expressed as a measure, for this vessel administrative characteristic.  |
| 01 | Value       | Att | Text              | The value, expressed as text, of this vessel administrative characteristic.  |
| 01 | Value       | Att | Code              | The code specifying a value of this vessel administrative characteristic.  |
| 01 | Value       | Att | Date Time         | The value, expressed as a date, time, date time, or other date time value, of this vessel administrative characteristic.                                     |
| 01 | Value       | Att | Indicator         | The value, expressed as an indicator, for this vessel administrative characteristic.   |
| 01 | Value       | Att | Quantity          | The value, expressed as a quantity, for this vessel administrative characteristic.   |
| 01 | Value       | Ass | FLUX_ Binary File | The value for this vessel administrative characteristic, such as registration certificate, expressed in a FLUX binary file.                                  |

# **FLUX\_Picture Entity**

Description: Entity used to provide information about a picture, such as a digital photograph, used in the context of Fisheries Languages for Universal eXchange (FLUX).

| Mult. | Business term  | Rel. | Туре          | Description  |
|-------|----------------|------|---------------|--|
| 01    | Identification | Att  | Identifier    | The identifier of this FLUX picture.   |
| 01    | Туре           | Att  | Code          | The code specifying a type of FLUX picture.  |
| 01    | Taken          | Att  | Date Time     | The date, time, date time, or other date value of when this FLUX picture was created.    |
| 01    | Area Included  | Att  | Identifier    | The area or location, expressed as an identifier, that is included in this FLUX picture. |
| 01    | Description    | Att  | Text          | The textual description of this FLUX picture.  |
| 01    | Digital Image  | Att  | Binary Object | Binary object data that is the actual digital image for this FLUX picture.               |

# Contact\_ Party Entity

Description: An individual, a group, or a body having a role as a contact.

| Mult. | Business term        | Rel. | Туре                                | Description   |
|-------|----------------------|------|-------------------------------------|---|
| 0n    | Identification       | Att  | Identifier                          | A unique identifier of the contact party.                             |
| 01    | Name                 | Att  | Text                                | The name, expressed as text, for this contact party.                  |
| 0n    | Description          | Att  | Text                                | A textual description of this contact party.                          |
| 0n    | Nationality_ Country | Att  | Identifier                          | A unique country of nationality identifier for this contact party.    |
| 0n    | Language             | Att  | Code                                | A code specifying a language for this specific contact party.         |
| 01    | Residence Country    | Att  | Identifier                          | The unique identifier of the residence country of this contact party. |
| 0n    | Role                 | Att  | Code                                | A code specifying the role of this contact party.                     |
| 0n    | Specified            | Ass  | Structured_ Address                 | A structured address specified for this contact party.                |
| 0n    | Specified            | Ass  | Contact_ Person                     | A specified person for this contact party.                            |
| 0n    | Telephone            | Ass  | Telecommunication_<br>Communication | Telephone communication information for this contact party.           |
| 0n    | Fax                  | Ass  | Telecommunication_<br>Communication | A facsimile communication information for this contact party.         |
| 0n    | URI                  | Ass  | Email_<br>Communication             | An email URI communication for this contact party.                    |

## Contact\_ Person Entity

Description: Entity used to provide information about an individual human being in a position to give assistance or information.

| Mult. | Business term      | Rel. | Туре | Description   |
|-------|--------------------|------|------|---|
| 01    | Title              | Att  | Text | The textual expression of the title associated with this contact person, such as Doctor.          |
| 01    | Given Name         | Att  | Text | The name, expressed as text, given to this contact person, usually by parents at birth.           |
| 01    | Middle Name        | Att  | Text | The middle name, expressed as text, of this contact person, usually given by parents at birth.    |
| 01    | Family Name Prefix | Att  | Text | The prefix, expressed as text, that precedes this contact person's family name, such as Van, Von. |

| 01 | Family Name | Att | Text                                | The name, expressed as text, that this contact person shares with members of his/her family.  |
|----|-------------|-----|-------------------------------------|---|
| 01 | Name Suffix | Att | Text                                | The suffix, expressed as text, that follows this contact person's name, such as Junior, Third.  |
| 01 | Gender      | Att | Code                                | The code specifying the gender of this contact person.  |
| 01 | Alias       | Att | Text                                | An alias, expressed as text, reflecting a shortened form of the<br>name of this person or any other name such as a nickname by<br>which this contact person may be known. |
| 01 | Telephone   | Ass | Telecommunication_<br>Communication | Telephone communication information for this contact person.  |
| 01 | Fax         | Ass | Telecommunication_<br>Communication | Facsimile communication information for this contact person.  |
| 01 | Email_ URI  | Ass | Email_<br>Communication             | The email Uniform Resource Identifier (URI) communication for this contact person.  |
| 01 | Website_URI | Ass | Website_<br>Communication           | The website Uniform Resource Identifier (URI) communication for this contact person.  |
|    |             |     |                                     |   |

#### Vessel Technical Characteristic Entity

Description: Entity used to provide information on a prominent technical attribute or aspect related to a particular vessel, such as the speed or hull material.

| Mult. | Business term | Rel. | Туре              | Description  |
|-------|---------------|------|-------------------|--|
| 1     | Туре          | Att  | Code              | The code specifying a type of vessel technical characteristic, such as maximum speed, trawling speed or hull material. |
| 0n    | Description   | Att  | Text              | A description, expressed as text, of this vessel technical characteristic.   |
| 01    | Value         | Att  | Measure           | The value, expressed as value, for this vessel technical characteristic.   |
| 01    | Value         | Att  | Text              | The value, expressed as text, of this vessel technical characteristic.   |
| 01    | Value         | Att  | Code              | The code specifying a value of this vessel technical characteristic.   |
| 01    | Value         | Att  | Date Time         | The value, expressed as a date, time, date time, or other date time value, of this vessel technical characteristic.    |
| 01    | Value         | Att  | Indicator         | The value, expressed as an indicator, for this vessel technical characteristic.  |
| 01    | Value         | Att  | Quantity          | The value, expressed as an quantity, for this vessel technical characteristic.   |
| 01    | Value         | Ass  | FLUX_ Binary File | The value for this vessel technical characteristic, such as or tonnage certificate, expressed in a FLUX binary file.   |

# FLUX Binary File Entity

Description: Entity used to provide information on a computer file stored in a binary format used in the Fisheries Language for Universal eXchange (FLUX).

| Mult. | Business term | Rel. | Туре          | Description  |
|-------|---------------|------|---------------|--|
| 01    | Title         | Att  | Text          | The title, expressed as text, for this FLUX binary file.   |
| 01    | MIME          | Att  | Code          | The code specifying the Multipurpose Internet Mail Extensions (MIME) type for this FLUX binary file. |
| 01    | Encoding      | Att  | Code          | The code specifying the encoding of this FLUX binary file.   |
| 01    | Character Set | Att  | Code          | The code specifying the character set of this FLUX binary file.                                      |
| 01    | Included      | Att  | Binary Object | The included binary object for this FLUX binary file.  |
| 01    | Description   | Att  | Text          | The textual description of this FLUX binary file.  |
| 01    | Size          | Att  | Measure       | The measure of the size of this FLUX binary file.  |
| 01    | Туре          | Att  | Code          | The code specifying the type of FLUX binary file, such as photo, spreadsheet.                        |
| 01    | Name          | Att  | Text          | The name, expressed as text, of FLUX binary file.  |

## Vessel Storage\_ Characteristic Entity

Description: Entity used to provide information on a prominent attribute or aspect related to the storage of a particular vessel.

| Mult. | Business term         | Rel. | Туре       | Description   |
|-------|-----------------------|------|------------|---|
| 0n    | Туре                  | Att  | Code       | A code specifying the type of this vessel storage characteristic.                     |
| 01    | Method_ Type          | Att  | Code       | The code specifying a method type of this vessel storage characteristic.              |
| 0n    | Capacity_ Value       | Att  | Measure    | A capacity value, expressed as measure, for this vessel storage characteristic.       |
| 0n    | Temperature_<br>Value | Att  | Measure    | A value of temperature, expressed as measure, for this vessel storage characteristic. |
| 01    | Unit_ Value           | Att  | Quantity   | The unit value, expressed as a quantity, for this vessel storage characteristic.      |
| 01    | Identification        | Att  | Identifier | The identifier for this vessel storage characteristic.                                |

# Vessel Crew Entity

Description: Entity used to provide information on a group of people who work on or operate a vessel.

| Mult. | Business term    | Rel. | Туре     | Description  |
|-------|------------------|------|----------|--|
| 01    | Member           | Att  | Quantity | The number of members in this vessel crew.                                     |
| 01    | Minimum_ Size    | Att  | Quantity | The minimum size, expressed as a quantity, of this vessel crew.                |
| 01    | Maximum_ Size    | Att  | Quantity | The maximum size, expressed as a quantity, of this vessel crew.                |
| 01    | On deck_ Size    | Att  | Quantity | The size, expressed as a quantity, of this vessel crew working on the deck.    |
| 01    | Above deck_ Size | Att  | Quantity | The size, expressed as a quantity, of this vessel crew working above the deck. |

#### Gear\_ Characteristic Entity

Description: Entity used to provide information on a prominent attribute or aspect related to a gear.

| Mult. | Business term | Rel. | Туре      | Description   |
|-------|---------------|------|-----------|---|
| 01    | Туре          | Att  | Code      | The code specifying a type of gear characteristic.  |
| 0n    | Description   | Att  | Text      | A description, expressed as text, of this gear characteristic.  |
| 01    | Value         | Att  | Measure   | The value, expressed as a measure, for this gear characteristic.  |
| 01    | Value         | Att  | Date Time | The value, expressed as a date, time, date time, or other date time value, of this gear characteristic. |
| 01    | Value         | Att  | Indicator | The value, expressed as an indicator, for this gear characteristic.                                     |
| 01    | Value         | Att  | Code      | The code specifying a value of this gear characteristic.  |
| 01    | Value         | Att  | Text      | The value, expressed as text, of this gear characteristic.  |
| 01    | Value         | Att  | Quantity  | The value, expressed as a quantity, of this gear characteristic.  |

# **FLUX Vessel Query Declaration:**

Description: The type of message which is used for querying for vessel information<sup>2</sup>.

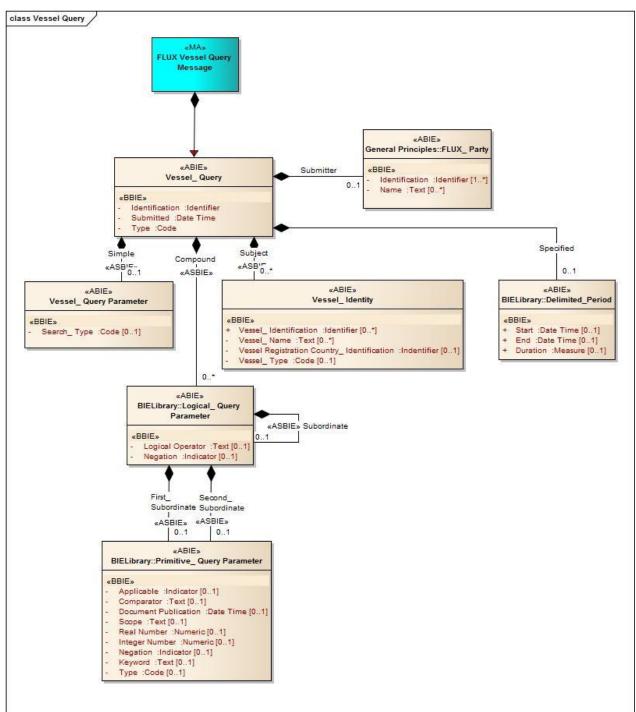

Figure 8: Class Diagram for FLUX Vessel Query message.

<sup>&</sup>lt;sup>2</sup> General Principles entities, such as FLUX\_ Party, are defined in FLUX P1000-1; general principles BRS.

## Vessel\_Query Entity

Description: Entity containing a formally raised question or request for information for vessel.

| Mult. | Business term  | Rel. | Туре                        | Description   |
|-------|----------------|------|-----------------------------|---|
| 1     | Identification | Att  | Identifier                  | The identifier for this vessel query.   |
| 1     | Submitted      | Att  | Date Time                   | The date, time, date time, or other date time value when this vessel query was submitted. |
| 1     | Туре           | Att  | Code                        | The code specifying the type of vessel query.   |
| 01    | Submitter      | Ass  | FLUX_ Party                 | The FLUX party that submits this vessel query.  |
| 01    | Simple         | Ass  | Vessel_ Query<br>Parameter  | The simple vessel query parameter for this vessel query.                                  |
| 0n    | Compound       | Ass  | Logical_ Query<br>Parameter | A compound logical query parameter for this vessel query.                                 |
| 01    | Subject        | Ass  | Vessel_ Identity            | The identity of a subject of this vessel query.   |
| 01    | Specified      | Ass  | Delimited_Period            | The delimited period of time specified for this vessel query.                             |

# Vessel\_ Query Parameter Entity

Description: Entity containing information that limits or restricts the scope of a vessel query.

| Mult. | Business term | Rel. | Туре | Description  |
|-------|---------------|------|------|--|
| 01    | Search_ Type  | Att  | Code | The code specifying the type of search parameter for this vessel query, such as full or partial. |

## Vessel Identity Entity

Description: Entity containing information which uniquely identifies a vessel.

| Mult. | Business term                                     | Rel. | Туре       | Description  |
|-------|---|------|------------|--|
| 0n    | Vessel_<br>Identification                         | Att  | Identifier | A vessel identifier for this vessel identity, such as an identifier defined by the Food and Agriculture Organisation (FAO), the radio call sign, or an external marking. |
| 0n    | Vessel_Name                                       | Att  | Text       | A vessel name, expressed as a text, for this vessel query identity.  |
| 01    | Vessel Registration<br>Country_<br>Identification | Att  | Identifier | The identifier of the registration country for this vessel identity.   |
| 01    | Vessel_Type                                       | Att  | Code       | The code specifying the type of vessel for this vessel identity.   |

# Logical\_Query Parameter Entity

| Mult. | Business term          | Rel. | Туре                           | Description  |
|-------|------------------------|------|--------------------------------|--|
| 01    | Logical Operator       | Att  | Text                           | The logical operator, expressed as text, for this logical query parameter.         |
| 01    | Negation               | Att  | Indicator                      | The indication of whether or not this logical query parameter is a negation.       |
| 01    | Subordinate            | Ass  | Logical_<br>Query Parameter    | The subordinate logical query parameter for this logical query parameter.          |
| 01    | First_Subordinate      | Ass  | Primitive_<br>Query Parameter  | The first subordinate primitive query parameter for this logical query parameter.  |
| 01    | Second_<br>Subordinate | Ass  | Primitive _<br>Query Parameter | The second subordinate primitive query parameter for this logical query parameter. |

Description: Entity containing parameter information on logical operations of a query.

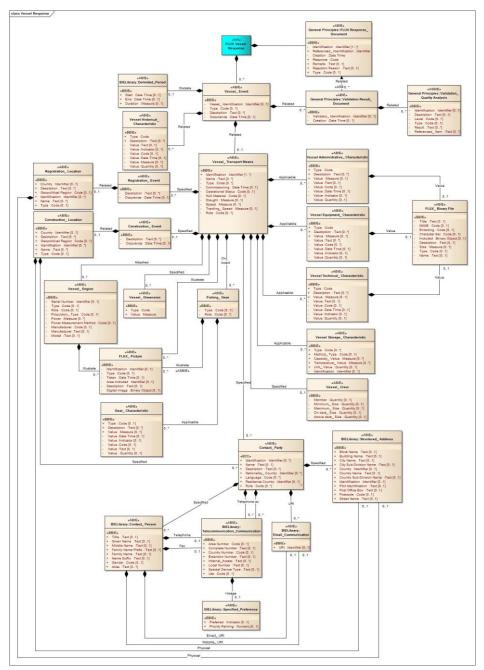

#### **Primitive\_Query Parameter Entity**

Description: Entity containing a query parameter that details a component of a query at the lowest level, typically identifying a comparison to a single value.

| Mult. | Business term           | Rel. | Туре      | Description   |
|-------|-------------------------|------|-----------|---|
| 01    | Applicable              | Att  | Indicator | The indication of whether or not this primitive query parameter is applicable.                                    |
| 01    | Comparator              | Att  | Text      | The comparator, expressed as text, for this primitive query parameter.  |
| 01    | Document<br>Publication | Att  | Date Time | The date, time, date time, or other date time value for a document publication of this primitive query parameter. |
| 01    | Scope                   | Att  | Text      | The scope, expressed as text, for this primitive query parameter.   |
| 01    | Real Number             | Att  | Numeric   | The value of the real number for this primitive query parameter.  |
| 01    | Integer Number          | Att  | Numeric   | The value of the integer number for this primitive query parameter.   |
| 01    | Negation                | Att  | Indicator | The indication of whether or not this primitive query parameter is a negation.                                    |
| 01    | Keyword                 | Att  | Text      | The keyword, expressed as text, for this primitive query parameter.   |
| 01    | Туре                    | Att  | Code      | The code specifying the type of primitive query parameter.  |

# **FLUX Vessel Response Declaration:**

Description: The type of message which is used for responding to a report or query for vessel information<sup>3</sup>. All entities included in this data model are identical to the ones defined above.

#### Figure 9: Class Diagram for Vessel Response message

<sup>&</sup>lt;sup>3</sup> General Principles entities, such as *FLUX\_Response*, are defined in FLUX P1000-1; general principles BRS.
