Bill LUDDY, Legal Advisor(US)
Jari SALO, TIEKE (FI)
Anders TORNQVIST, Comfact (SE)

Excused absents:

(points that may require your action in red below)

General summary – overview

The draft version 0.13 was accepted as a consensus document with a few minor modifications (eliminating a reference to an Annex with a list of international standards as there were never any submissions for this).

It was repeated that the Repository B (technical implementations) would be separated from the rest of the document as a new project. This was decided for two reasons: there is not a sufficient number of submissions received for this repository and the working group does not want to delay the publication of the recommendation to wait for these submissions.

The current draft will be submitted to the Bureau as a draft version 1.0 before the end of the month of July.

One outstanding point was the 'Virtuous Circle' and it was agreed to deal with this during the Public Review using the commenting process of the public review.

Public review must be at least two months. It was discussed to try to allow the review to continue until the end of November in order to move towards the next steps of the UN/CEFACT ODP in a timely manner.

Rec14 WG will probably only have a partial-day meeting at the UN/CEFACT 22nd Forum in Sardinia. We shall request teleconference capabilities in order to allow all experts to participate.

- If you are available to attend, registration is obligatory and available at:
<http://www.unece.org/index.php?id=33036>
- Rec14 Working Group will most likely meet only a half-day and will likely discuss:
 - a. Repository of submissions for Legally Enabling Environment
 - b. Repository of submissions of Technical Solutions
 - c. Comments received during the Public Review (which will likely continue a month or two after the meeting).
- There will be a number of other projects meeting which may be of interest to you; I will let you know more as soon as these are announced.
