2 Introduction

The current practice of exchange of business documents by means of telecommunications – usually defined as e-Business presents a major opportunity to improve the competitiveness of companies, especially for Small and Medium Enterprise (SME) whatever its size can be.

About all the functions within any entity provide input to accounting entries and accounting entries in turn will provide output towards aggregated figures from accounts.

Each individual accounting entry, with standardized tagged elements is the basis for a very powerful tool and from this point on, the [no longer missing] link between e-Business and e-Accounting / WebLedger.

Carrying on an initiative of EDIFICAS Europe, the European Expert Group 11 (EEG11) – Accounting and auditing – started the discovery of elements for accounting entries in 2004, inter alia based upon the ENTREC Edifact message.

The Accounting Entry has been developed with contributions and submissions from several parts of Europe and collaboration of United States.

This first version of the Business Requirements Specification (BRS) is presented for comments from the other regions.

After a period of public exposure TBG12 will draft the final version of the BRS addressing comments received and forward for further processing through the UN/CEFACT Forum process with the goal of developing a UN/CEFACT standard document.

The purpose of this document is to define globally consistent accounting entry processes for the worldwide accounting and auditing domains, using the UN/CEFACT Modelling Methodology (UMM) approach and Unified Modelling Language to describe and detail the business processes and transactions involved.

The structure of this document is based on the structure of the UN/CEFACT Business Requirements Specification (BRS) document reference CEFACT/ICG/005.

3 Objective

The objective of this document is to standardize the information entities and the business processes, of the Accounting Entry used by the enterprises in the Journal, Ledger, and Audit Business Processes.

An Accounting Entry is the translation in monetary measurement unit of any transaction or transaction step that currently affects the financial situation of the enterprise.

An Accounting Entry is a business document supported by a justificatory document which may be either internal or external, such as a payroll, a voucher, a spreadsheet, a provision for amortization, a provision for revenue, an invoice, a bank statement, etc.

Accounting Entries are sequentially recorded in chronological order into one journal or several auxiliary sub-journals. Journalized validated accounting entries are definitely irreversible.

The Accounting Entry standard is valid for financial accounting, cost accounting, provisional or budgetary accounting, and more generally for any kind of various and numerous analytical accounting processes.

The business document consists of a set of Business Information Entities (BIE), which are preferably taken from libraries of reusable business information entities. The contents of the business document and the Business Information Entities are presented using class diagrams.

3.1 Definition of terms

Terms	Definition
Account	<p>A ranking and recording unit of entries corresponding to expenditure and receipts relating to a particular period and/or purpose.</p> <p>Contains either the detail of all entry lines booked into this account and/or the totals summarising debits and credits.</p>
Accounting entry, book entry, entry	Technique that consists in recording the equal debit and credit monetary values of a transaction into suitable accounts, accounting books.
Accounting (entry) line, entry item	Is corresponding to the debit or credit amount (that is part of an accounting entry), posted on a ledger account and recorded in a journal. In addition to the amount and the account identifier, the accounting entry line must include the date of the transaction, the explanation of the entry, a reference toward the journal and the identification of the source document originating the debit or credit amount.
Bookkeeping	Activity that consists in sorting and recording into accounts the financial flow related to any transaction and economic fact occurring in an entity.
Irreversibility	The fact that an accounting entry posted into accounts and books can not be undone or altered.
Journal	<p>Book or file in which each accounting entry is recorded chronologically prior to be carried over into the ledger book.</p> <p>The [central or main] journal is generally split into secondary journals dedicated to a type of transactions such as “sales invoices”, “purchase invoices”, “bank account”, “petty cash”, “wages”, “depreciations”, etc. Accounting practice regulations related to the journal process guarantee the immutability and prevent any addition or removal of accounting entry.</p>
Recording Accounting Entry	See Accounting entry
Matching	<p>Match mark. Action of putting a mark, a character or a string of characters vis-à-vis opposite amounts of two or more postings in an account which indicates the relation between them; e.g. the credit amount of a payment and the debit amount of the corresponding invoice.</p> <p>Matching describes as well the action of putting a mark in front of amounts as well as the matching process itself.</p>

Ticking	<p>Tick mark or check mark</p> <p>Action of putting a sign vis-à-vis an amount or a post in a ledger to indicate it has been verified; the sign itself.</p> <p>Ticking describes as well the action of putting a sign on the paper as well as the control process itself of the element</p> <p>Symbol used by the accounting professional to indicate the work he did comparing the figures posted into an account with those on the document justifying the entry or when he verified correctness of a calculation.</p>
(Accounting) Voucher	<p>Basis of the posting into account and support of evidence, the voucher is a document that attests to the reality of an operation, authenticates its conclusion, is the originator of accounting entry, and is used for audit control matters.</p>

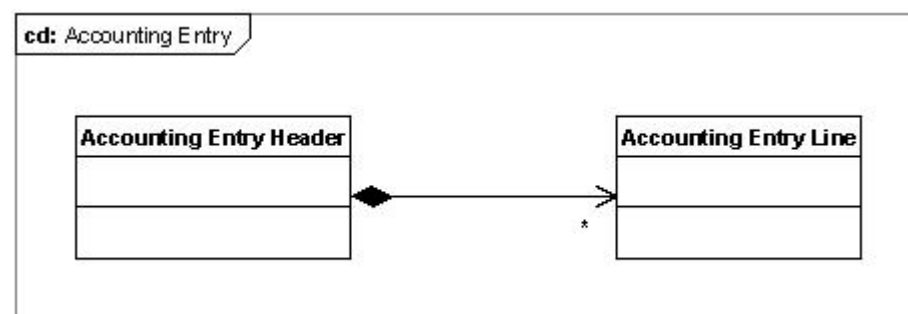

3.2 Target technology solution(s)

The canonical class diagram of the accounting entry presented in this document should be used to generate the UN/CEFACT ebXML standard schema of the accounting entry in the accounting and audit domains. This RSM document together with the corresponding BRS document and the ebXML schema are intended to be the basis for the standard accounting entry.

4 Information payload to be implemented

4.1 Conceptual data model

4.1.1 Accounting Entry

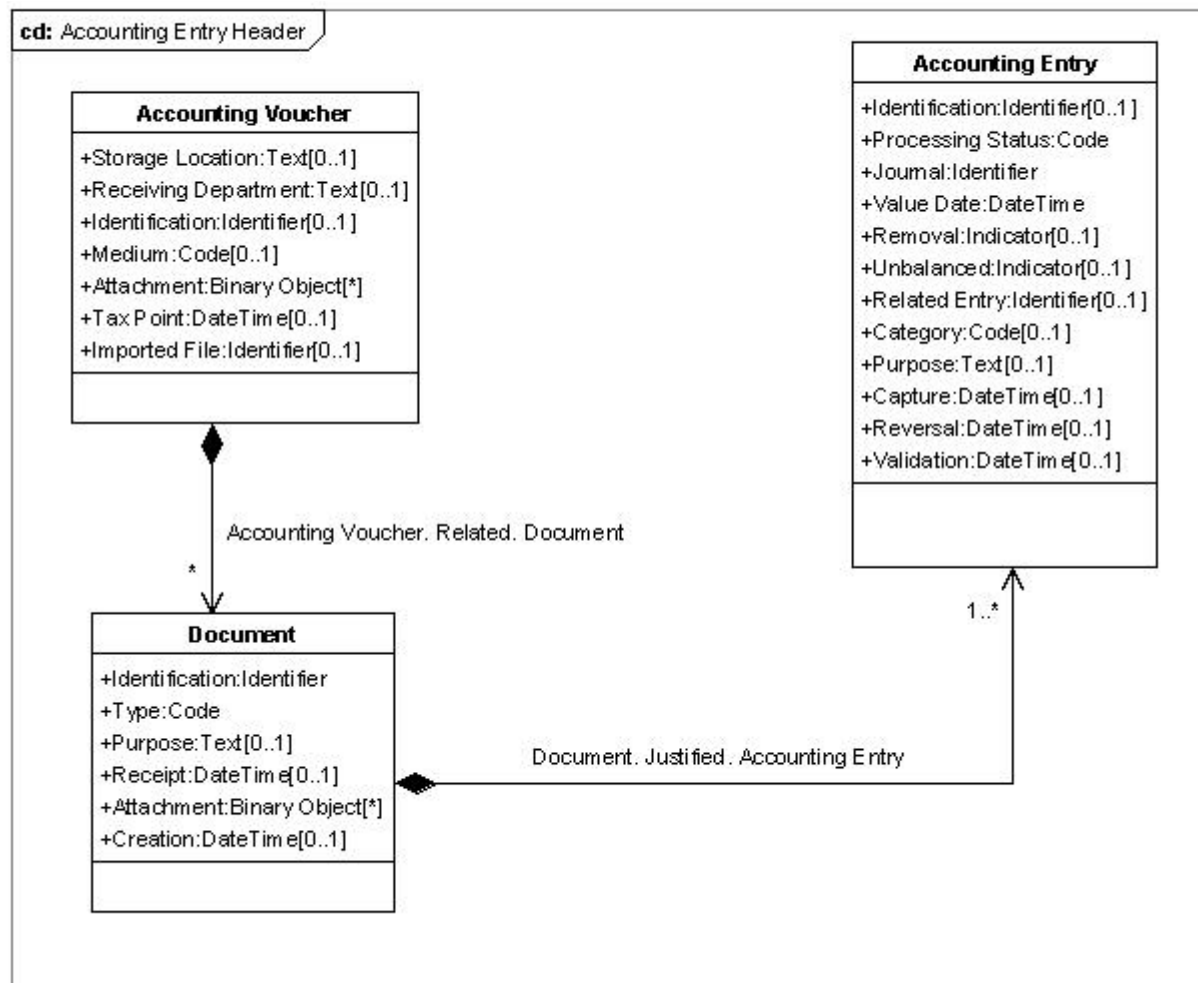

Description: A message that enables recording of financial debit and credit flows into accounts.

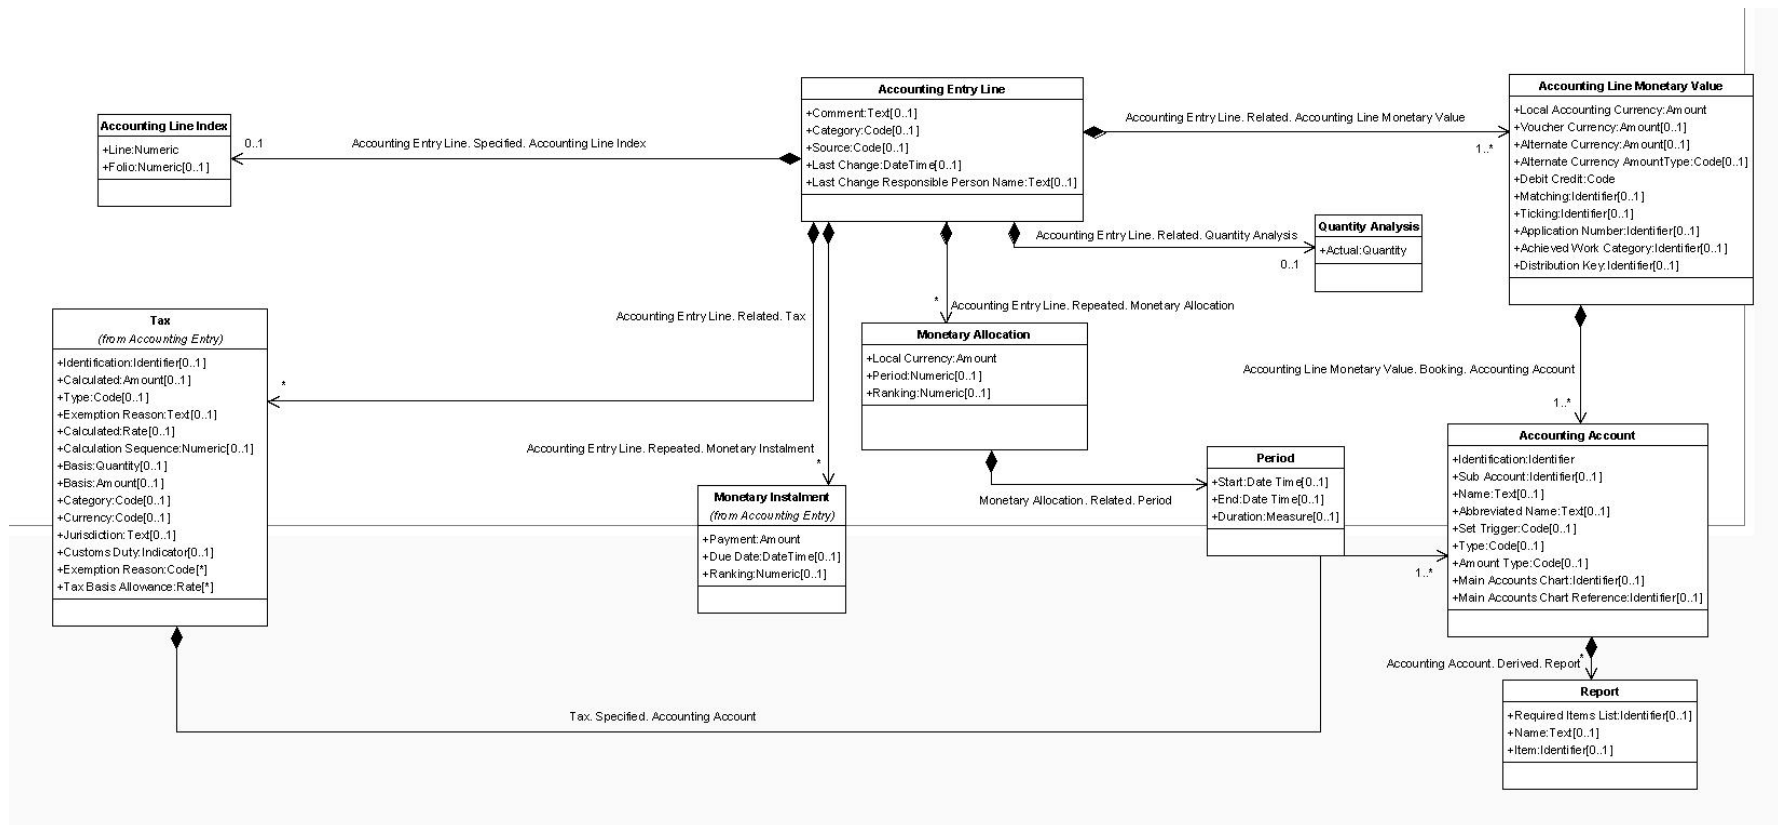

The Accounting Entry defines accounts, amounts, references, terms of payment, quantities, currencies, taxes recorded into accounting books.

Accounting entries are most often originally recorded in an organization based on the “journal” in which entries are captured in a chronological order. In order to alleviate and for best location of entries capture practice, the journal is subdivided into specialized sub-journals such as “sales”, “purchases”, “cash”, etc... in conformance with the list and number of appropriate sub-journals as convenient for the entity. Obviously most often one message will contain more than one single accounting entry; this means that a “accounting message” is needed to enclose all accounting entry messages into a “entries section”. This message “container” will be developed in another TBG12 project.

4.1.2 Accounting Entry Header

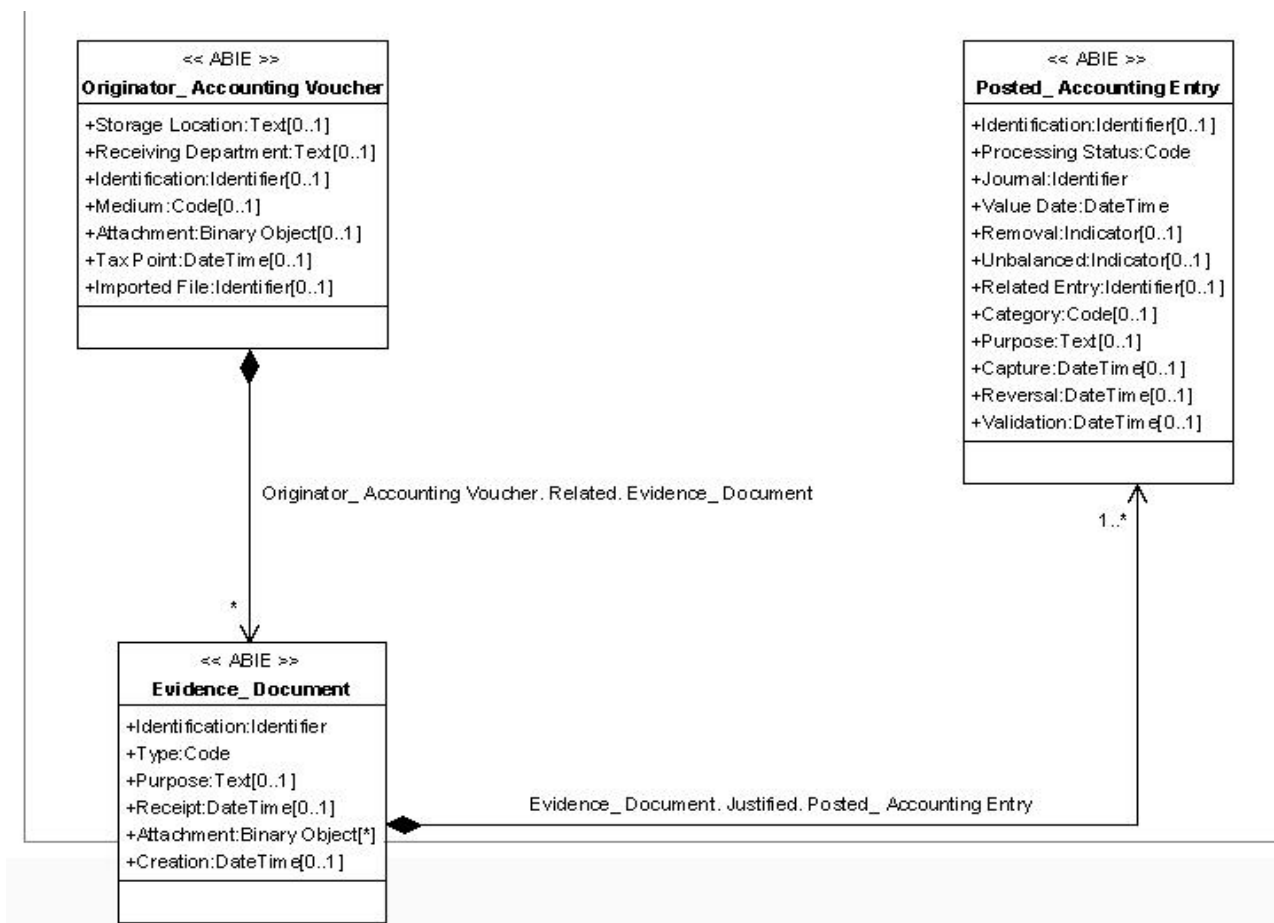

4.1.3 Accounting Entry Line

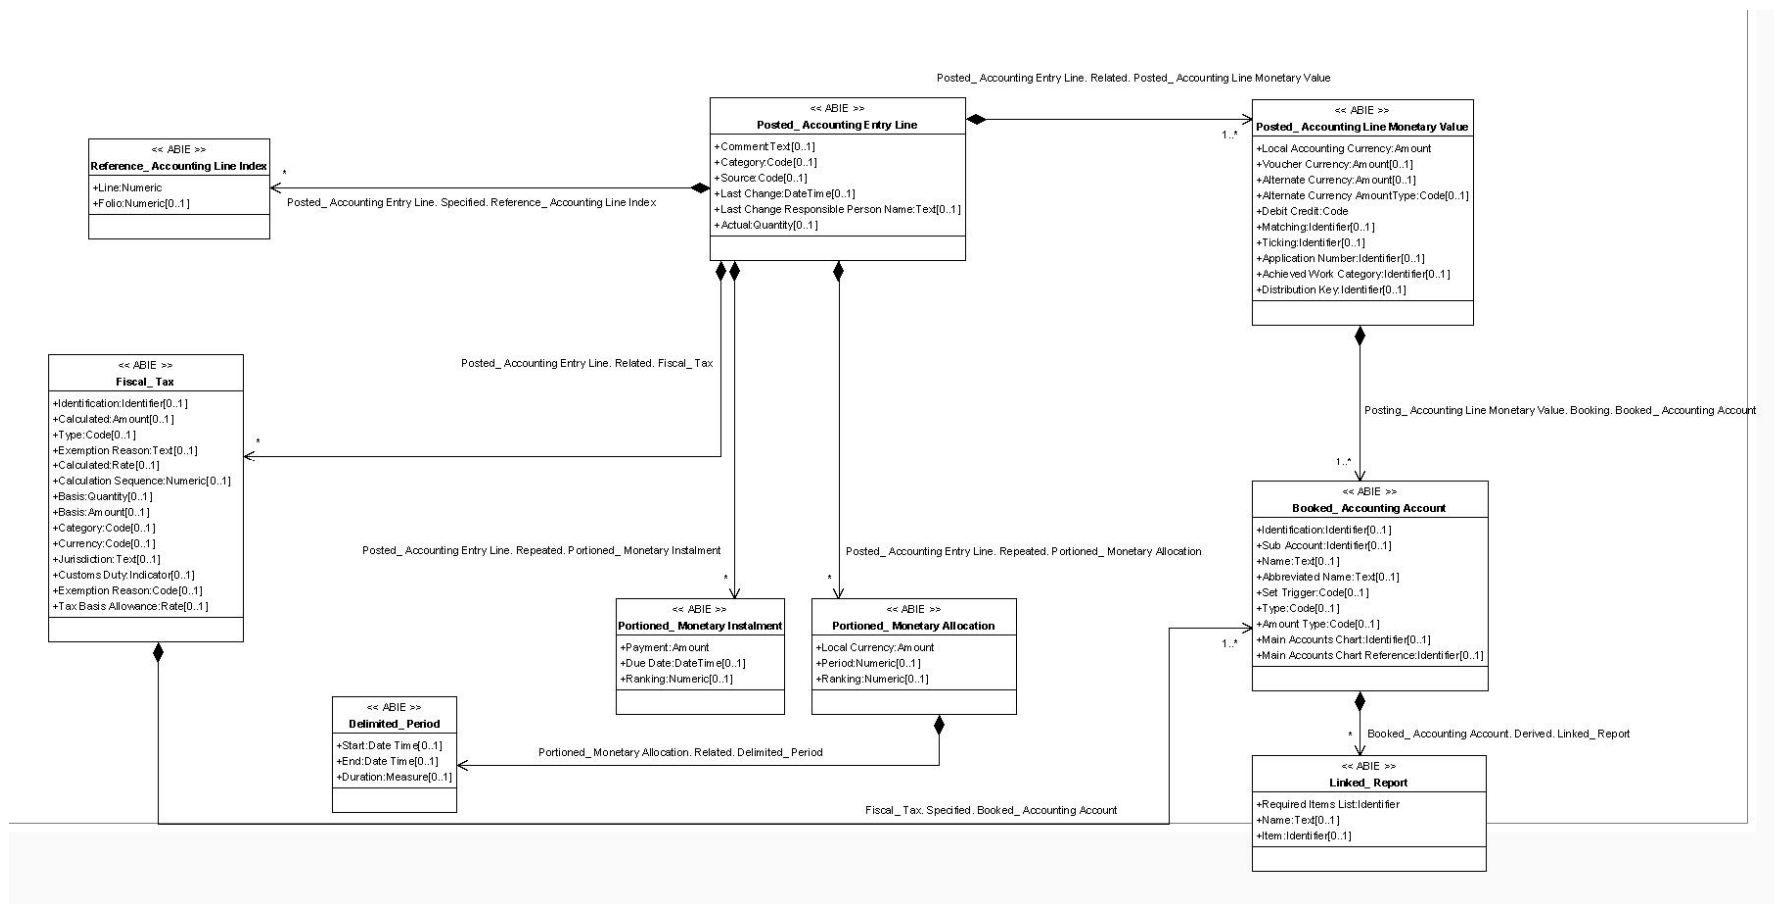

4.2 Canonical data model

4.2.2 Accounting Entry Line

5 Business information entity reference

This section contains the list of all the Business Information Entities that are both used within the canonical data model and are variations from the standard Core Components, including the UN/CEFACT Registry version that served as the reference point.

5.1 Basic Business Information Entities

This section identifies any restrictions that have to be applied to the BBIE in the context in which it is being used.

BBIE dictionary entry name	Data Type	Usage Rules	Core Component dictionary Entry Name	Content Component Restrictions			Supplementary component Restrictions

5.3 Association Business Information Entities

This section identifies any all the ASBIEs where multiplicity restrictions will be applied.

ASBIE name	Multiplicity restriction	Additional comments
Originator_ Accounting Voucher. Related. Evidence_ Document	0..*	Contains from zero to many documents.
Evidence_ Document. Justified. Posted_ Accounting Entry	1..*	Upstream to Accounting Entry. Details; a document induces from one up to many accounting entries.
Posted_ Accounting Entry. Detailed. Posted_ Accounting Entry Line	1..*	One accounting entry contains at least two entry lines to balance a debit amount booked with a credit amount.
Posted_ Accounting Entry Line. Specified. Reference_ Accounting Line Index	0..1	Each accounting entry line refers to an index after being processed by an accounting information system.
Posted_ Accounting Entry Line. Related. Posted_ Accounting Line Monetary Value	1..*	Each accounting entry line contains at least one amount and may contain several ones expressed into different currencies
Posted_ Accounting Line Monetary Value. Booking. Booked_ Accounting Account	1..*	Each accounting entry line must contain at least one account and may be booked into several accounting accounts such as cost accounting, job, budget line, etc.
Booked_ Accounting Account. Derived. Linked_ Report	0..*	One or several reports, returns, declarations, mandatory or not may derive from accounting account.

ASBIE name	Multiplicity restriction	Additional comments
Posted_ Accounting Entry Line. Repeated. Portioned_ Monetary Allocation	0..*	Monetary allocation repetition
Portioned_ Monetary Allocation. Related. Delimited_ Period	1	Period limitation for monetary allocation
Posted_ Accounting Entry Line. Repeated. Portioned_ Monetary Instalment	0..*	Monetary instalment repetition
Posted_ Accounting Entry Line. Related. Fiscal_ Tax	0..*	Tax linked with this accounting entry line
Fiscal_ Tax. Specified. Booked_ Accounting Account	1..*	Accounting account in use for booking tax

5.4 Qualified data type

The qualified data type codes lists used in the message “Accounting Entry” may be either restricted enumeration from UN-EDIFACT/UNCL maintained by UN-CEFACT, or from ISO official lists of codes, or are lists maintained by EDIFICAS EU when the code list was created for typical accounting purpose.

In the current RSM document the term “D08B” used as part of EDIFICAS EU codes lists name belongs to the standard UN-CEFACT versioning codification scheme. Qualified data types can be downloaded from <http://www.edificas.eu/index.php/eng/Download/Code-lists>

5.4.1 Qualified data type in Accounting Entry Header

qDT Name	Associated code list

9	"FDD 8""	"The voucher is a 8"" Floppy Disk."
10	USB key	The voucher is a Universal Serial Bus key.

5.4.1.2 EDIFICASEU_AccountingEntryProcessing_D08B.TXT

1	Validated	The accounting entry is validated.
2	Non validated	The accounting entry is non validated.
3	Proposed	The accounting entry is proposed.
4	Simulated	The accounting entry is simulated.
5	Postponed	The accounting entry is postponed.
6	Removed	The accounting entry is removed.

5.4.1.3 EDIFICASEU_AccountingEntryCategory_D08B.TXT

- 1 Financial The accounting entry concerns the financial accounting.
- 2 Budget The accounting entry concerns a budget accounting.
- 3 Comparison The accounting entry is used for a comparison.
- 4 Standard The accounting entry is a standard debit-credit entry.
- 5 Recurrent The accounting entry is a recurrent entry.
- 6 Reordered The accounting entry is a reordered entry.
- 7 Defined by user The accounting entry is defined by user.

5.4.1.4 UNECE_DocumentNameCode_D08B.TXT

Code	Name	Definition
105	Purchase order	Document/message issued within an enterprise to initiate the purchase of articles, materials or services required for the production or manufacture of goods to be offered for sale or otherwise supplied to customers.
220	Order	Document/message by means of which a buyer initiates a transaction with a seller involving the supply of goods or services as specified, according to conditions set out in an offer, or otherwise known to the buyer.
223	Lease order	Document/message for goods in leasing contracts.
224	Rush order	Document/message for urgent ordering.
245	Delivery release	Document/message issued by a buyer releasing the despatch of goods after receipt of the Ready for despatch advice from the seller.

315	Contract	Document/message evidencing an agreement between the seller and the buyer for the supply of goods or services; its effects are equivalent to those of an order followed by an acknowledgement of order.
320	Acknowledgement of order	Document/message acknowledging an undertaking to fulfil an order and confirming conditions or acceptance of conditions.
325	Proforma invoice	Document/message serving as a preliminary invoice, containing - on the whole - the same information as the final invoice, but not actually claiming payment.
326	Partial invoice	Document/message specifying details of an incomplete invoice.
380	Commercial invoice	Document/message claiming payment for goods or services supplied under conditions agreed between seller and buyer.
389	Self-billed invoice	An invoice the invoicee is producing instead of the seller.
393	Factored invoice	Invoice assigned to a third party for collection.
394	Lease invoice	Usage of INVOIC-message for goods in leasing contracts.
395	Consignment invoice	Commercial invoice that covers a transaction other than one involving a sale.
398	Cross docking despatch advice	Document by means of which the supplier or consignor informs the buyer, consignee or the distribution centre about the despatch of goods for cross docking.

399	Transshipment despatch advice	Document by means of which the supplier or consignor informs the buyer, consignee or the distribution centre about the despatch of goods for transshipment.
455	Extended credit advice	Document/message sent by an account servicing institution to one of its account owners, to inform the account owner of an entry that has been or will be credited to its account for a specified amount on the date indicated. It provides extended commercial information concerning the relevant remittance advice.
481	Remittance advice	Document/message advising of the remittance of payment.
533	Original voucher	To indicate that the document/message is an original.
534	Copy voucher	To indicate that the document/message is a copy.
640	Delivery order	Document/message issued by a party entitled to authorize the release of goods specified therein to a named consignee, to be retained by the custodian of the goods.
