Discussion items

Time	Item	Who	Notes
80min	Draft		<ul style="list-style-type: none">• Went through 3.3 eg. singularity, single source of truth. Luca commented the mention of singularity is one way to describe only one record, and avoiding double-spend problem, though how we do that is another issue. Edmund commented if the mention of singularity is in the same MLETR context, vs a new term.• Went through Centralised vs Decentralised,• Went through Non-fungible Tokens(NFT), Manuel suggested reordering the paras so they relate. Lars suggested of mentioning as DLT technology, eg. no need to specify Ethereum as other DLT technology can also support NFT.
5min	Other matters		<ul style="list-style-type: none">• Edmund commented he had issues with the meeting links. (after note: as the previous set of meetings ending Dec 2021 had non-regular timings, it was not quite possible to use the same meeting links for all the meetings under Zoom, hence the meeting links was listed in the email content)• Simone commented if the documents could mark how far people have gotten since previous meetings so they can prepare for next meeting. Kay suggested he would start with putting some labels to indicate.
