## Executive Summary

### Project purpose

The purpose of this work is to develop a model of the supply chain that can be used as a reference for all parties engaged in the supply chain in order to assist in harmonization of trade processes and data, use of best practice, promotion and training.

### Project scope

The Model builds on the earlier work carried out by the Business Process Analysis Group (BPAWG) of UN/CEFACT. This described the major processes involved in the International Supply Chain in its simplest form by the three key business processes involved-Buy, Ship, Pay- and the main Business Partner Types involved- Customer, Supplier, Intermediary and Authority.
