Public Review: Extension of Cross Industry Technical Artefacts Deliverables

Public Review: Extension of Cross Industry Technical Artefacts Deliverables

CLOSED

The UN/CEFACT Buy/Pay PDA is pleased to announce the opening of the Public Review period for the Extension of Cross Industry Technical Artefacts Project. The purpose of this project is to develop the technical artefacts needed to allow users to implement the business messages for cataloguing, quotation, ordering, delivering and remittance advice based on the SCRDM and Core Component Business Document Assembly (CCBDA). The UN/CEFACT Supply Chain Reference Data Model (SCRDM) is a standardized and harmonized semantic framework fully compliant with the UN/CEFACT Core Component Library. The SCRDM focusses on interoperability, re-use of supply chain core components (globally standardized semantics), and will speed-up and ease implementation. It builds the foundation for deriving syntax-neutral CCBDA compliant semantic business models.

Any comments should be submitted to the Project Lead Rolf Wessel using the Public Review Comment Template until 28 September 2017.

GUIDELINE

- Download all the files for Public Review for this project
- Take note of your comments using the Public Review Comment Template for this project
- Send by email your Public Review Comment Template to the Public Review Editor before the end of the Public Review Period

PUBLIC REVIEW PERIOD
