ing Area - Cross Border Management Dc

(Access only for registered members)

Background Information

The Domain endeavors to facilitate trade by way of streamlining the business processes and procedures involved in the domestic and cross border regulatory environment. This domain aims to provide guidance on various procedures, create awareness on the best practices, enhance digitalization through electronic information exchange and also provide logical grouping of information through data models related to this domain.

Scope

The Domain works to support national, regional, and international governmental efforts in adopting harmonized cross border regulatory procedures and thereby facilitate trade. Towards this goal, the domain acts as a focal point related to regulatory processes, by various work programs including, but not limited to, building reference data model to logically group information related to cross border domain, create guidance material on the processes.

Active Projects

- Cross border multimodal digital corridors for regulatory related movement of consignment data and consignment status information for trade facilitation
