

Supply Chain Management Domain (SCM)

[Explore other](#)

Supply Chain Management Domain (SCM)

PDA	Buy/Pay
Coordinators	Edmund Gray

Background Information

The Supply Chain Management Domain (SCM) creates standards for business messages from Quotation to Invoice. Along with the Procurement Domain it creates deliverables for the "Buy" part of the Buy/Pay PDA. The Procurement Domain creates tendering business messages for all sectors but particularly for Public Procurement and Construction Contract awarding process. The SCM Domain deals with messages following the award of the Contract.

This group is the successor to TBG 1 (UN/CEFACT Forum International Trade & Business Processes Group 1). TBG=International Trade and Business Processes Group within the former structure of UN/CEFACT before 2012

Using the BUY-SHIP-PAY (International Supply Chain Reference Model), the SCM covers all aspects except the Ship and Pay processes.

Scope

The purpose of the Supply Chain Management group is to:

- Develop and maintain Business Process Models, the Business Transaction Models, the semantics and the contents in a syntax neutral way that they fulfil the requirements of the Trade and Industry communities within the framework of the Supply Chain and e-Procurement. The supply chain and e-procurement covers the Purchasing, Material Management and Product development areas
- approve based on the syntax neutral business transactions the corresponding UN/CEFACT syntax solutions provided by the UN/CEFACT Methodology and Technology group
- encourage the active participation in SCM of interested user communities in Industry, Trade and Procurement, in accordance with UN/CEFACT membership criteria
- maintain close relations with other UN/CEFACT groups as appropriate
- Promote and support the work of UN/CEFACT
