Action items for Meeting #003

- ☐ [Ian Watt](#), [Steven Capell](#), [Rajiv Garg](#) and Everyone -
 1. Establish dictionary of terms before the 30/7 next Bureau call
 - a. Fast data
 - b. Snippets
 - c. API's
 - d. Restful
 - e. JSON
 - f. Way point
 - g. State transition changes

- h. Etc.
 - 2. Amend the wording on the proposal for the CUE page to ensure it is clear that the ORCH FP is more about developing and sharing methodology, certainly not encroaching on projects run by PDA's/Domains
 - 3. Pass comment that the proposed work by the ORCH FP has been considered v the Mandate, Strategy and POW - considered aligned with the Mandate & Strategy – will contribute to the revision 2019-2021 of the PoW
 - 4. Start to promote the 0.5 day workshop at the next forum as being about methodology, framework, and providing guidance for the consistent development of API's regardless if related to API's with ERP's etc, API's G2B API's B2B or API's IoT2B etc
 - 5. Proper tidy version of the above which will change as the framework idea progresses – but is a start.
 - 6. Ensure Rec-24 is studied by all on the ORCH FP.
- [Rajiv Garg](#) Schedule next meeting
