## Executive Summary

### Project purpose

The purpose of the project is to define the procedures for the creation and publication of CCTS 2.01, CCBDA 1.0 and NDR 2.1 Business Standards. Reason for version 2: [http://www.unece.org/cefact/codesfortrade/ccts\\_index.html](http://www.unece.org/cefact/codesfortrade/ccts_index.html)

### Project scope

The ODP process of developing a Business Standard from inception to publication for CCTS 2 and NDR 2 artefacts includes but is not limited to:

- Harmonization of core components
- Verification of libraries and other artefacts
- Definition of the publication bundle
- Publication schedules

The project will define all new procedures and artefacts required to develop a Business Standard using the CCL Library and the CCTS 2.01, CCBDA 1.0 and NDR 2.1 Technical Specifications.

The project will be conducted by undertaking a proof of concept Business Standard development. The CII semantic content in the CCL will be reused by defining CCBDA Message Assembly restrictions. A public review version of the resultant proof of concept Cross Industry Invoice (CII) will be published. The proof of concept example used will therefore be semantically equal to published CII D15B which will increase the usefulness of the project results for comparison purposes.

# Project Overview
