

CUE - App maintenance

CUE - App maintenance

Back to: [How-to articles](#)

This page describes process of maintenance of CUE's applications (macros)

Assuming user has CUE account with administrator rights and Atlassian account on atlassian.com

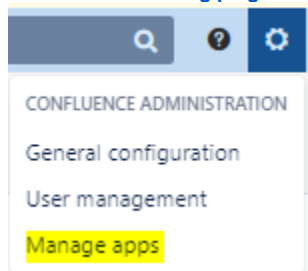

Regularly check Confluence administration - Manage apps <https://uncefact.unece.org/plugins/servlet/upm>

1. Update apps to newer versions
2. Renew licenses
3. Check apps compatibility before new major Confluence version upgrade

Step-by-step guide

Update apps

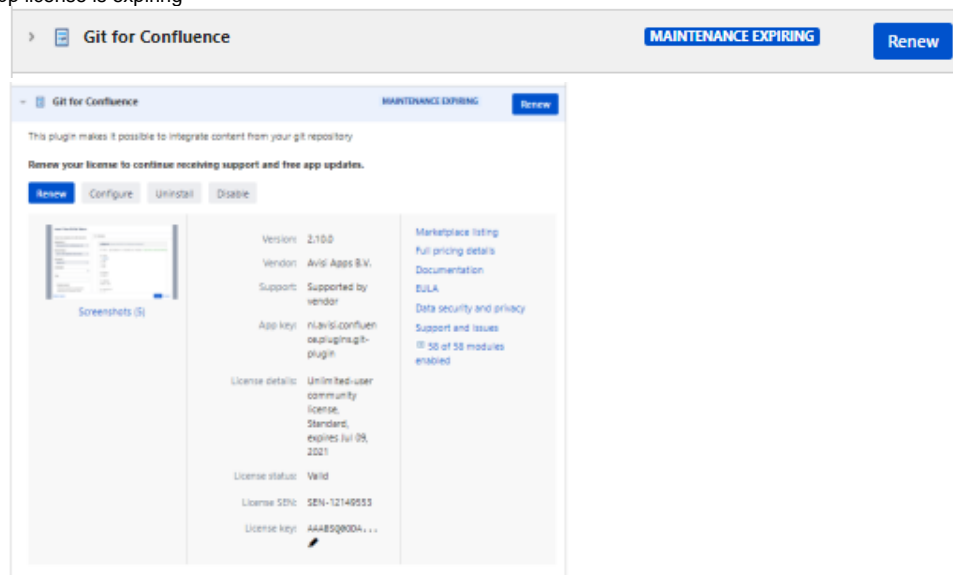

1. On <https://uncefact.unece.org/plugins/servlet/upm> (Confluence administration - manage Apps)

2. When new version of app is available
 - TODO

Renew licences

1. On <https://uncefact.unece.org/plugins/servlet/upm> (Confluence administration - manage Apps)
2. When app license is expiring

3. Click to Renew - user will be redirected to Atlassian Store
 - (its a god practice to be logged in with Atlassian account before this step)
 - License for particular app will be added to the card with 0USD Price (due to **UNECE's Atlassian Confluence Community License**)
4. Click on Check out

```

- Paste it to particular App's License key field and click Update

11. License will be extended

Check apps compatibility

1. On <https://uncefact.unece.org/plugins/servlet/upm> (Confluence administration - manage Apps)
2. At the bottom of the page go to Confluence update check <https://uncefact.unece.org/plugins/servlet/upm/check?source=manage>
3. Select Confluence version and click Check

Check compatibility for update to:

4. Apps will be categorized into Incompatible, Compatible and Unknown

Incompatible

These apps have not yet been marked as compatible with Confluence 7.12.2, through the [Atlassian Marketplace](#) before proceeding with the product update

>  **Forms**

>  Link Preview for Confluence

Compatible

These apps are compatible with Confluence 7.12.2. No action needed.
