Project Purpose
The project's purpose is to prepare a submission of CCs for the handling of property claims to the UN/CEFACT Core Component Library.

Project Scope
Over the last few years the insurance domain in UN/CEFACT has developed a complete set of core components for the handling of motor claims. Now the insurance domain will extend its development to the handling of property claims.

Project Deliverables
The project deliverables are
Submission of core components (ACC, BCC, ASCC) to the UN/CEFACT Core Component Library.

Exit Criteria
The project will be finalised when the submission of the core components and their harmonisation within UN/CEFACT succeeds in the publication of a UN/CEFACT CCL containing the new core components.

If during the course of the project the project team membership falls to a level that the project goal cannot be reached anymore the project will closed.
