Project Purpose

The project's purpose is to prepare a submission of CCs for Commercial Insurance to the UN/CEFACT Core Component Library.

Project Scope

Over the last few years the insurance domain in UN/CEFACT has developed a complete set of core components for the administration of contracts. The focus was on private property and casualty insurance and on motor insurance for private vehicles and commercial fleets. Now the insurance domain will extend its development to commercial risks in property and casualty insurance.

Project Deliverables

The project deliverable is Submission of core components (ACC, BCC, ASCC) to the UN/CEFACT Core Component Library.

Exit Criteria

The project will be finalised when the submission of the core components and their harmonisation within UN/CEFACT succeeds in the publication of a UN/CEFACT CCL containing the new core components.
If during the course of the project the project team membership falls to a level that the project goal cannot be reached anymore the project will closed.
