Executive Summary

Project purpose

The purpose of the project is to create Business Process Models and Business Class Diagrams for documenting the business scenarios and business transactions involved in Small scaled Lodging House (abbr. as SLH) Travel Product Information Process for the small scaled lodging house industry. The output will be used to obtain and validate the XML messages to support the business transactions.

Project scope

The SLH Travel Product Information Process will be to provide buying parties with the lodging house travel product information. The SLHs are those that usually have around 100 guest rooms or less and serve meals as one of their typical services. They have more human touched services than large scaled ones. The variety of services as travel products are to be well supplied in the information.

Project Overview
